展望

Prospect

2020年宏觀環境不確定因素加大。年初突發的新型冠狀病毒疫情,預計將對2020年一季度的GDP及消費產生衝擊。特別是旅遊、餐飲、零售等行業短期影響較大,但後續隨中國疫情獲得控制應對全年影響有限。中國政府正在實施強有力的措施控制疫情、積極復工,疫情危機有望快速得到緩解,同時中國經濟的規模、韌性和潛力預計將使中國經濟在疫情後能夠快速恢復。

集團方便麵事業、飲品事業亦因不同品類 特質將受到疫情不同影響。方便麵作為國 家民生戰略物資,作為穩定民生的重要產 品,將善盡企業社會責任,盡力滿足疫情 期間高企的需求,飲品銷售雖在疫情期間 面臨終端開店數下降的影響,但疫情結束 後預期有反彈性消費。整體而言,預計 2020年方便麵事業將有好的成長,而飲品 事業預計上半年營收和出貨量因疫情將有 短暫壓力,但下半年應高速反彈。

疫情期間:集團積極保障特殊時期正常生產經營活動,通過「穩生產,穩防控,穩供應」等措施推進供應鏈儘早復工,銷售工作安全有序展開。同時響應國家「保價格、保質量、保供應」號召,全力保障物資供應,為「抗疫」提供可靠的後勤保障。

The automated raw materials purchase orders placing helps to improve the transparency of procurement, production, delivery and warehouse processing, and changes the previous multi-level communication method among departments. Backed by system information sharing, production plans can be executed more efficiently. On the other hand, MRP helps rationalize the work assignment of different production lines, make them run smoothly without overloading or idling. Meanwhile, the system helps to balance capacity allocation among suppliers, effectively adjusts the inventory level of suppliers during the low and peak seasons, reduces procurement costs, improves flexibility of production scheduling, and further improves service quality and customer satisfaction.

截至2019年12月31日止年內,本公司 已遵守香港聯合交易所有限公司上市規則 ([上市規則])附錄十四所載之「企業管治 守則」(「管治守則」),惟關於守則條文第 A.4.1及A.4.2條有所偏離除外。該等偏離 之原因將於下文進一步説明。

守則條文第A.4.1條

根據守則條文第A.4.1條, 非執行董事應 以指定任期聘任並須接受重選。由於目前 本公司之獨立非執行董事並無指定任期, 故本公司偏離此條文。然而,根據本公司 之公司組織章程細則,所有董事至少每3 年須輪席退任一次。於每屆股東周年大會 上,當時三分之一之在任董事(倘人數並 非三之倍數,則最接近但不少於三分之一 之人數)須輪值卸任並膺選連任。因此, 董事會認為此方面已採取足夠措施確保本 公司之企業管治常規可充分保障股東之權 益,並符合管治守則所規定的標準。

守則條文第A.4.2條

根據守則條文第A.4.2條,每名董事(包括 有特定委任期者)應至少每三年輪值告退 一次。根據本公司之公司組織章程細則, 董事會主席在任時毋須輪值告退,於決定 每年須退任之董事人數時亦不計算在內。 董事會認為,董事會主席領導之持續性對 本集團發展之穩定性及規劃、制定及落實 長遠的策略及業務計劃至為重要。因此, 董事會認為雖然上述細則之條文與守則條 文第A.4.2條有所偏離,但符合本公司的 最佳利益。

本公司將參考企業管治的最新發展定期檢 討及提升其企業管治常規。

We have, throughout the year ended 31 December 2019, complied with the code provisions of the Corporate Governance Code (the "CG Code") as set out in Appendix 14 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules"), except for the deviations from code provisions A.4.1 and A.4.2. The reasons for these deviations are explained below.

Code provision A.4.1

Code provision A.4.1 provides that non-executive directors should be appointed for a specific term, subject to re-election. Our Company deviates from this provision because the independent non-executive Directors of our Company do not currently have specific terms of appointment. However, the articles of association of our Company provide that all the Directors are subject to retirement by rotation at least once every three years and at each annual general meeting, onethird of the Directors for the time being or, if the number is not a multiple of three, then, the number nearest to but not less than onethird, shall retire from office by rotation and may offer themselves for re-election. As such, the Board considers that sufficient measures have been put in place to ensure our Company's corporate governance practice in this aspect provides sufficient protection for the interests of shareholders to a standard commensurate with that of the CG code.

Code Provision A.4.2

According to code provision A.4.2, each director (including those with a specific appointment period) shall be subject to retirement by rotation at least once every three years. According to the Company's articles of association, the chairman of the Board is not subject to retirement by rotation. He is not included in the number of directors who are required to retire each year. The Board believes that the continuity of the leadership of the chairman of the Board is critical to the stability of the Group's development and the planning, formulation and implementation of long-term strategies and business plans. Accordingly, the Board considers that although the provisions of the above rules deviate from Code Provision A.4.2, it is in the best interests of the Company.

We will periodically review and improve our corporate governance practices with reference to the latest corporate governance developments.

Then, through interviews with management and risk seminars, risk identification and risk management framework are completed. Thirdly, fully participate in the discussion through senior management to complete the risk assessment, and then formulate risk response strategies. Tingyi (Cayman Islands) Holding Corp.

(incorporated in the Cayman Islands with limited liability)

OPINION

We have audited the consolidated financial statements of Tingyi (Cayman Islands) Holding Corp. (the "Company") and its subsidiaries (together the "Group") set out on pages 132 to 301, which comprise the consolidated statement of financial position as at 31 December 2019, and the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2019, and of its financial performance and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

BASIS FOR OPINION

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements for the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

關鍵審計事項

機器及設備的減值

貴集團之物業、機器及設備於2019年12月31日的賬面值為人民幣23,014,000,000元。其中於2019年12月31日的機器及設備賬面值為人民幣13,218,000,000元。任何已識別的資產減值可能會對綜合財務報表構成重大影響。截至2019年12月31日,貴集團對若干個別機器及設備所確認之減值撥備為人民幣152,000,000元。

於結算日,貴集團考慮內部和外來的信息,包括但不只限於技術過時,對貴集團 造成負面影響的重大資產使用用途改變, 延長閒置的時期,資產的經濟效益比預期 更差,以判斷機器及設備有否存在減值跡 象。

倘存有此跡象,減值測試將會執行。資產的賬面值將減值至可回收金額,則其公允值減去出售成本及使用價值之較高者。貴集團須對機器設備作減值評估並主要採用使用價值以評估資產所屬的現金產生單位(「現金產生單位」)之可收回款額或去出適用,參考若干個別資產的公允值減去出售成本以作為該等資產的可收回金額之計量。

我們判斷機器及設備的賬面值為關鍵審計事項是基於對綜合財務報表的重要性及作任何減值處理時所涉及之判斷和估計。當進行減值檢討和測試時,在考慮減值指標及釐定減值模型所作出的重大假設均也涉及管理層的重大判斷。

有關披露分別載於綜合財務報表附註 5(ii)及15內。

Key Audit Matter

Impairment of machinery and equipment

The carrying amount of the Group's property, plant and equipment amounted to RMB23,014 million at 31 December 2019. Of which, the carrying amount of the Group's machinery and equipment as at 31 December 2019 was RMB13,218 million. Any impairment of those assets identified may have material impact on the consolidated financial statements. An impairment loss of RMB152 million has been recognised for certain machinery and equipment for the year ended 31 December 2019.

At the end of each reporting period, the Group reviewed internal and external sources of information, including but not limited to technical obsolescence to usage, significant change in use of assets with adverse effect on the Group, prolonged period of time being idle and economic performance of an asset was expected to be worse than expected, to assess whether there is any indication that machinery and equipment may be impaired.

If any such indication exists, an impairment test will be conducted. The carrying amounts of the assets will be written down to their recoverable amounts which are the higher of fair value less costs of disposal and value in use. The Group shall perform impairment assessment on machinery and equipment by estimating the recoverable amounts of the cash generating units ("CGUs") to which the assets belong principally based on their value in use or, if applicable, to measure the recoverable amount of certain individual assets with reference to their fair value less costs of disposal.

We identified the carrying amount of machinery and equipment as a key audit matter because of its significance to the consolidated financial statements and the judgment and estimation involved in the impairment review and test of machinery and equipment including the consideration of the indicators of impairment and the determination of the key assumptions applied in the impairment model.

Related disclosures are included in notes 5(ii) and 15 to the consolidated financial statements.

我們的審計如何處理關鍵審計事項

我們就管理層對物業、機器及設備的減值 評估所執行的主要程序包括:

- a) 與管理層討論用於識別有減值跡象的機器及設備之基準及流程及審閱使用紀錄,以及機器及設備的盈利率,假如確定有該等減值跡象,評估管理層的減值測試是否根據香港財務準則之要求而進行:
- b) 評估管理層就計算減值金額所採用 之減值模型及釐定資產所屬的現金 產生單位時所作出的判斷的恰當性:
- c) 驗證計算使用價值中現金流模式的 運算的準確性;
- d) 依據我們對食品及飲料業務及市場 的知識,質疑關鍵假設的合理性;
- e) 將輸入數據對賬至支持憑證,如未來生產計劃及經批准的預算,並考慮該等預算的合理性及可行性;
- f) 參考活躍市場的市場價值(如適用) 以驗證已估算之公允值減去出售成 本;及
- g) 考慮貴集團就有關減值評估披露的 充足性。

How our audit addressed the Key Audit Matter

Our key procedures in relation to management's impairment assessment of property, plant and equipment included:

- Assessing the appropriateness of the impairment model applied by the management in calculating the impairment charges and the judgments applied in determining the CGUs to which the assets belong;
- c) Verifying the mathematical accuracy of the discounted cash flow model used in the value in use calculation;
- d) Challenging the reasonableness of key assumptions based on our knowledge of the food and beverage industry and market;
- Reconciling input data to supporting evidence, such as future production plans and approved budgets and assessing the reasonableness and feasibility of such plans and budgets;
- f) Verifying the estimated fair value less costs of disposal by making reference to the market price of an active market, if applicable; and
- g) Considering the adequacy of the Group's disclosure in respect of the impairment assessment.

關鍵審計事項

對杭州百事可樂飲料有限公司(「杭州百事 可樂」)擁有控制權及商譽減值之評估

於2017年9月,貴集團通過執行買賣協議 (「買賣協議」)和一份授權書令杭州百事可 樂成為了貴集團的非全資擁有附屬公司。 貴集團現時於杭州百事可樂持有50%股權 及過半投票權。

合併杭州百事可樂需要重大的判斷和估 計,包括釐定杭州百事可樂的擁有權。 於結算日, 貴集團重新評估是否有任何 事實和情況顯示其對杭州百事可樂的擁有 權產生變化。根據重估結果,管理層總 結 貴集團擁有杭州百事可樂的控制權; 須面對可變回報及有能力透過其權力影 響這些回報。因此,杭州百事可樂繼續 在 貴集團截至2019年12月31日止年度 的綜合財務報表中合併入賬。

貴集團於2017年9月通過收購確認人民幣 98,000,000元的商譽,管理層對商譽進行 年度減值測試, 商譽已分配至關連現金產 生單位,而現金產生單位的可收回金額將 由管理層根據使用現金流量預測計算的使 用價值釐定。計算涉及重大判斷和估計, 如預測現金流量,折現率和增長率。

我們判斷杭百事可樂控制及商譽的賬面值 為關鍵審計事項是基於對綜合財務報表的 重要性,和就釐定對杭州百事可樂擁有控 制權及作任何商譽減值處理時所涉及的判 斷和估計。該商譽減值及測試涉及重大程 度的管理層判斷,以釐定根據使用價值估 計可收回金額時採用的主要假設。

Key Audit Matter

Control over Hangzhou Pepsi-cola Beverage Co., Ltd ("HZPS") and impairment assessment of goodwill

HZPS became a non-wholly owned subsidiary of the Group through an execution of sale and purchase agreement (the "SPA") and a contractual arrangement in September 2017. The Group currently holds 50% equity interest in HZPS and has a majority of the voting rights of HZPS.

The consolidation of HZPS required a significant amount of judgement and estimations, including the determination of control over HZPS. At the end of the reporting period, the Group re-assessed whether any facts and circumstances indicate there are changes of its control over HZPS. Based on the results of the re-assessment, the management concluded that the Group has power over HZPS; has exposure to variable returns from its involvement with HZPS; and has the ability to use its power over HZPS to affect its returns. Therefore, the financial statements of HZPS continue to be consolidated in the Group's consolidated financial statements for the year ended 31 December 2019.

The Group recognised goodwill of RMB98 million from the acquisition in September 2017. Management performs an annual impairment test on goodwill. The goodwill was allocated to related CGU, and the recoverable amount of CGU will be determined by management based on value-in-use calculation using cash flow projection. The calculations involved significant judgement and estimations, such as forecast cash flows, discount rates and growth rates.

We identified the control over HZPS and carrying amount of goodwill as key audit matters because of their significance to the consolidated financial statements and the judgment and estimation involved in determination of control over HZPS and accounting for any impairment on goodwill which involves significant degree of management judgment in determining key assumptions applied in estimating recoverable amounts based on value in use model.

Related disclosures are included in notes 5(ii), 19 and 20 to the consolidated financial statements.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- 評價董事採用會計政策的恰當性及 其作出會計估計和相關披露的合理 性。
- 檢視董事採用持續經營會計基礎的 恰當性,並根據所取得的審計憑證 來決定是否存在著任何事項或不確 定因素令 貴集團持續經營能力產 生重大疑慮。如我們認為存在任何 重大不確定因素,則須在核數師報 告中提醒注意綜合財務報表中的相 關披露。若有關披露不足,則我們 應當發表非無保留意見。我們的結 論是基於我們於本核數師報告日止 所取得的審計憑證。然而,未來事 件或情況可能導致貴集團不能繼續 持續經營。
- 評價綜合財務報表的整體列報方 式、結構及內容,包括披露事項, 以及綜合財務報表是否以公平的方 式呈列相關交易及事項。
- 就 貴集團內實體或業務活動的財 務資料獲取充分、適當的審計憑 證,以對綜合財務報表發表意見。 我們負責指導、監督和執行貴集團 之審計。我們為審計意見承擔全部 負責。

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities and business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

我們與治理層溝通了計劃的審計範圍、時間安排、重大審計發現等事項,包括我們在審計期間識別出內部控制的任何重大缺陷。

我們亦向治理層提交聲明,說明我們已符合有關獨立性的相關專業道德要求,並與他們溝通可能合理地被認為會影響我們獨立性的所有關係和其他事項,以及在適用的情況下,相關的防範措施。

從與治理層溝通的事項中,我們決定哪些事項對本期綜合財務報表的審計最為重要,因而構成關鍵審計事項。我們會在核數師報告中描述這些事項,除非法律法規不允許對某件事項作出公開披露,或在極罕見的情況下,若合理預期在我們報告中溝通某事項而造成的負面後果將會超過其產生的公眾利益,我們將不會在此等情況下在報告中溝通該事項。

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law and regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

(b) Basis of consolidation (Continued)

Non-controlling interests are presented, separately from owners of the Company, in the consolidated income statement and the consolidated statement of comprehensive income and within equity in the consolidated statement of financial position. The non-controlling interests in the acquiree, that are present ownership interests and entitle their holders to a proportionate share of the acquiree's net assets in event of liquidation, are measured initially either at fair value or at the present ownership interests' proportionate share in the recognised amounts of the acquiree's identifiable net assets. This choice of measurement basis is made on an acquisition-by-acquisition basis. Other types of non-controlling interests are initially measured at fair value unless another measurement basis is required by HKFRSs.

Allocation of total comprehensive income

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income is attributed to the owners of the Company and the non-controlling interest even if this results in the non-controlling interest having a deficit balance.

Changes in ownership interests

Changes in the Group's ownership interests in a subsidiary that do not result in a loss of control are accounted for as equity transactions. The carrying amounts of the controlling and non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiary. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in "transactions with non-controlling interests reserve" within equity and attributed to the owners of the Company.

(b) Basis of consolidation (Continued)

Changes in ownership interests (Continued)

When the Group loses control of a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. The amounts previously recognised in other comprehensive income in relation to the disposed subsidiary are accounted for on the same basis as would be required if the Group had directly disposed of the related assets or liabilities. Any investment retained in the former subsidiary and any amounts owed by or to the former subsidiary are accounted for as a financial asset or liability, interest in associate, interest in joint venture or others as appropriate from the date when control is lost.

(c) Goodwill

Goodwill arising on an acquisition of a business (including the acquisition of joint control of a joint operation in which the activity constitutes a business) is measured at the excess of the consideration transferred, the amount of any noncontrolling interest in the acquiree and the fair value of any previously held equity interest in the acquiree over the acquisition date amounts of the identifiable assets acquired and the liabilities assumed of the acquired business.

Goodwill on acquisition of business is recognised as a separate asset and is carried at cost less accumulated impairment losses, which is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. For the purpose of impairment test and determination of gain or loss on disposal, goodwill is allocated to cash-generating units ("CGUs"). An impairment loss on goodwill is not reversed.

All other property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and accumulated impairment losses. Repairs and maintenance are charged to profit or loss during the year in which they are incurred.

Depreciation is provided to write off the cost less accumulated impairment losses of property, plant and equipment, other than construction in progress, over their estimated useful lives as set out below from the date on which they are available for use and after taking into account their estimated residual values, using the straight-line method. Before 1 January 2019, prepaid lease payments are up-front payments to acquire fixed term interests in lessee-occupied land that are classified as operating leases. The premiums are stated at cost less accumulated amortisation and accumulated impairment losses and are amortised over the period of the lease on a straight-line basis. From 1 January 2019, those payments are accounted for as right-of-use assets.

(i) Subsidiaries

A subsidiary is an entity that is controlled by the Group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Group reassesses whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the elements of control.

In the Company's statement of financial position, which is presented within these notes, an interest in a subsidiary is stated at cost less impairment loss. The carrying amount of the interest in a subsidiary is reduced to its recoverable amount on an individual basis, if it is higher than the recoverable amount. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. A joint arrangement is an arrangement of which two or more parties have joint control. Joint control is a contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control. The Group reassesses whether it has joint control of an arrangement and whether the type of joint arrangement in which it is involved has changed, if facts and circumstances change.

The Group's interest in associate or joint venture is accounted for under the equity method of accounting, except when the investment or a portion thereof is classified as held for sale. Under the equity method, the investment is initially recorded at cost and adjusted thereafter for the post-acquisition changes in the Group's share of the investee's net assets and any impairment loss relating to the investment. Except to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the investee, the Group discontinues recognising its share of further losses when the Group's share of losses of the investee equals or exceeds the carrying amount of its interest in the investee, which includes any long term interests that, in substance, form part of the Group's net investment in the investee.

Financial assets (except for trade receivables without a significant financing component) are initially recognised at their fair value plus, in the case of financial assets not carried at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial assets. The classification of financial assets at initial recognition depends on the Group's business model for managing the financial assets and the financial asset's contractual cash flow characteristics. Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing them, in which case all affected financial assets are reclassified on the first day of the first annual reporting period following the change in the business model.

Derivatives embedded in a hybrid contract in which a host is an asset within the scope of HKFRS 9 are not separated from the host. Instead, the entire hybrid contract is assessed for classification.

1) Financial assets measured at amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVPL:

- it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses arising from impairment, derecognition or through the amortisation process are recognised in profit or loss.

The Group's financial assets at amortised cost include bank balances and cash, pledged bank deposits, longterm time deposits and trade and other receivables.

2) Mandatory FVOCI

A financial asset is measured at Mandatory FVOCI if both of the following conditions are met and is not designated as at FVPL:

The classification is determined on an instrument-by-instrument basis.

These equity investments are subsequently measured at fair value and are not subject to impairment. Dividends are recognised in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other gains or losses are recognised in other comprehensive income and shall not be subsequently reclassified to profit or loss. Classification and measurement

Financial liabilities are initially recognised at their fair value plus, in the case of financial liabilities not carried at FVPL, transaction costs that are directly attributable to the issue of the financial liabilities.

The Group's financial liabilities include trade and other payables, lease liabilities, interest-bearing borrowings and other non-current liabilities. All financial liabilities, except for financial liabilities at FVPL, are recognised initially at their fair value and subsequently measured at amortised cost, using the effective interest method, unless the effect of discounting would be insignificant, in which case they are stated at cost.

Financial liabilities at FVPL include financial liabilities held for trading, financial liabilities designated upon initial recognition as at FVPL and financial liabilities that are contingent consideration of an acquirer in a business combination to which HKFRS 3 applies. They are carried at fair value, with any resultant gain and loss excluding interest expenses recognised in profit or loss, except for the portion of fair value changes of financial liabilities designated at FVPL that are attributable to the credit risk of the liabilities, which is presented in other comprehensive income unless such treatment would create or enlarge an accounting mismatch in profit or loss. The amounts presented in other comprehensive income shall not be subsequently transferred to profit or loss. Upon derecognition, the cumulative gain or loss is transferred directly to retained profits. Interest expenses are presented separately from fair value gain or loss.

ECL的計量

ECL是對金融工具預期存續期 的信貸虧損(即所有現金短缺的 現值)的概率加權估計。

就金融資產而言,信貸虧損為 應付合約實體的合約現金流量 與該實體預期收取的現金流量 之間的差額的現值。

整個存續期ECL代表將在金融工具的預期存續期內發生的所有可能違約事件的ECL,而12個月的ECL代表預期由金融工具的違約事件產生的整個存續期ECL其中部分,該部分在報告日期之後12個月內可能發生。

Impairment of financial assets and other items

The Group recognises loss allowances for expected credit losses ("ECL") on financial assets that are measured at amortised cost to which the impairment requirements apply in accordance with HKFRS 9. Except for the specific treatments as detailed below, at each reporting date, the Group measures a loss allowance for a financial asset at an amount equal to the lifetime ECL if the credit risk on that financial asset has increased significantly since initial recognition. If the credit risk on a financial asset has not increased significantly since initial recognition, the Group measures the loss allowance for that financial asset at an amount equal to 12-month ECL.

Measurement of ECL

ECL is a probability-weighted estimate of credit losses (i.e. the present value of all cash shortfalls) over the expected life of the financial instrument.

For financial assets, a credit loss is the present value of the difference between the contractual cash flows that are due to an entity under the contract and the cash flows that the entity expects to receive.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of a financial instrument while 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

Where ECL is measured on a collective basis, the financial instruments are grouped on the following one or more shared credit risk characteristics:

- past due information
- nature of instrument (ii)
- nature of collateral (iii)
- (iv) industry of debtors
- (v) geographical location of debtors
- external credit risk ratings

Loss allowance is remeasured at each reporting date to reflect changes in the financial instrument's credit risk and loss since initial recognition. The resulting changes in the loss allowance are recognised as an impairment gain or loss in profit or loss with a corresponding adjustment to the carrying amount of the financial instrument, except in the case of Mandatory FVOCI, the loss allowance is recognised in other comprehensive income and accumulated in the investment revaluation reserve (recycling).

Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that the Group may not receive the outstanding contractual amounts in full if the financial instrument that meets any of the following criteria.

- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group); or

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. In particular, the following information is taken into account in the assessment:

- the debtor's failure to make payments of principal or interest on the due dates;
- an actual or expected significant deterioration in the financial instrument's external or internal credit rating (if available);
- an actual or expected significant deterioration in the operating results of the debtor; and

actual or expected changes in the technological, market, economic or legal environment that have or may have a significant adverse effect on the debtor's ability to meet its obligation to the Group.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial instrument has increased significantly since initial recognition when contractual payments are more than 30 days past due.

Notwithstanding the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date.

Low credit risk

A financial instrument is determined to have low credit risk if:

- it has a low risk of default; (i)
- the borrower has a strong capacity to meet its contractual cash flow obligations in the near term; and
- adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

As detailed in note 45 to the consolidated financial statements, amounts due from an associate, joint ventures, certain other receivables and related parties are determined to have low credit risk.

For trade receivables without a significant financing components or otherwise for which the Group applies the practical expedient not to account for the significant financing components, the Group applies a simplified approach in calculating ECL. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired include observable data about the following events:

- a breach of contract, such as a default or past due event.
- (c) the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider.
- (d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation.

(c) the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

If a performance obligation is not satisfied over time, the Group satisfies the performance obligation at a point in time when the customer obtains control of the promised asset. In determining when the transfer of control occurs, the Group considers the concept of control and such indicators as legal title, physical possession, right to payment, significant risks and rewards of ownership of the asset, and customer acceptance.

Sales of instant noodles and beverages is recognised at a point in time at which the customer obtains the control of the promised asset, which generally coincides with the time when the goods are delivered to customers and the title is passed.

Service income of logistic services is recognised over time when services are rendered.

For revenue recognised over time under HKFRS 15, provided the outcome of the performance obligation can be reasonably measured, the Group applies the output method (i.e. based on the direct measurements of the value to the customer of the goods or services transferred to date relative to the remaining goods or services promised under the contract) to measure the progress towards complete satisfaction of the performance obligation because the method provides a faithful depiction of the Group's performance and reliable information is available to the Group to apply the method. Otherwise, revenue is recognised only to the extent of the costs incurred until such time that it can reasonably measure the outcome of the performance obligation. The principal input applied in the output method for transportation services to external customers is based on the distance already travelled to date.

Transaction price: significant financing components

When the contract contains a significant financing component (i.e. the customer or the Group is provided with a significant benefit of financing the transfer of goods or services to the customer), in determining the transaction price, the Group adjusts the promised consideration for the effects of the time value of money. The effect of the significant financing component is recognised as an interest income or interest expense separately from revenue from contracts with customers in profit or loss.

The Group determines the interest rate that is commensurate with the rate that would be reflected in a separate financing transaction between the Group and its customer at contract inception by reference to, where appropriate, the interest rate implicit in the contract (i.e. the interest rate that discounts the cash selling price of the goods or services to the amount paid in advance or arrears), the prevailing market interest rates, the Group's borrowing rates and other relevant creditworthiness information of the customer of the Group.

The Group has applied the practical expedient in paragraph 63 of HKFRS 15 and does not adjust the consideration for the effect of the significant financing component if the period of financing is one year or less.

Variable consideration

If the consideration promised in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the promised goods or services to a customer. The variable consideration is estimated by using either the expected-value or the most-likely-amount method whichever is better to predict the entitled amount. The estimated variable consideration is then included in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised of the contract will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

Variable consideration: volume-based rebates

The Group gives rebates to selected customers. The Group estimates the volume rebates using the expected-value method and assesses whether the estimated variable consideration is constrained with reference to the customer's historical rebates entitlement and accumulated purchases to date. Any significant estimation variances will be analysed and taken into consideration in the current estimation and assessment. Typically, the estimated consideration is not constrained.

Interest income

Interest income from financial assets is recognised using the effective interest method. For financial assets measured at amortised cost or Mandatory FVOCI that are not creditimpaired, the effective interest rate is applied to the gross carrying amount of the assets while it is applied to the amortised cost (i.e. the gross carrying amount net of loss allowance) in case of credit-impaired financial assets.

Contract assets and contract liabilities

If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, the contract is presented as a contract asset, excluding any amounts presented as a receivable. Conversely, if a customer pays consideration, or the Group has a right to an amount of consideration that is unconditional, before the Group transfers a good or service to the customer, the contract is presented as advance payments from customers when the payment is made or the payment is due (whichever is earlier). A receivable is the Group's right to consideration that is unconditional or only the passage of time is required before payment of that consideration is due.

For a single contract or a single set of related contracts, either a net contract asset or a net advance payment from customers is presented. Contract assets and advance payments from customers of unrelated contracts are not presented on a net basis.

It is common for the Group to receive from the customer the whole or some of the contractual payments before the goods are delivered (i.e. the timing of revenue recognition for such transactions). The Group recognises an advance payment from customers until it is recognised as revenue. During that period, any significant financing components, if applicable, will be included in the advance payment from customers and will be expensed as accrued unless the interest expense is eligible for capitalisation.

The Company's functional currency is United States Dollar ("US\$") and majority of its subsidiaries have Renminbi ("RMB") as their functional currency. The consolidated financial statements are presented in RMB, which is the Company's presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

The results and financial position of all the Group's entities that have a functional currency different from the presentation currency ("foreign operations") are translated into the presentation currency as follows:

- (a) Assets and liabilities for each statement of financial position presented are translated at the closing rate at the end of the reporting period;
- (b) Income and expenses for each income statement are translated at the weighted average exchange rates;
- (c) All resulting exchange differences arising from the above translation and exchange differences arising from a monetary item that forms part of the Group's net investment in a foreign operation are recognised as a separate component of equity;

- On the disposal of a foreign operation, which includes a disposal of the Group's entire interest in a foreign operation, a partial disposal involving the loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest is no longer equity-accounted for, the cumulative amount of the exchange differences relating to the foreign operation that is recognised in other comprehensive income and accumulated in the separate component of equity is reclassified from equity to profit or loss when the gain or loss on disposal is recognised.
- On the partial disposal of the thee Group's interest in a subsidiary that includes a foreign operation which does not result in the Group losing control over the subsidiary, the proportionate share of the cumulative amount of the exchange differences recognised in the separate component of equity is re-attributed to the non-controlling interests in that foreign operation and are not reclassified to profit or loss.

(o) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost, which comprises all costs of purchase and, where applicable, costs of conversion and other costs that have been incurred in bringing the inventories to their present location and condition, is calculated using the weighted average cost method. Net realisable value represents the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.

本集團於每個結算日檢討內部 及外間資訊,以確認其物業、 機器及設備、無形資產、使用 權資產聯營公司權益及合營公 司權益是否可能已經出現減值 現象,或之前所確認之減值虧 損是否已不再存在或可能已經 減少。若出現任何以上的現 象,本集團將需評估資產的可 收回價值。據此,資產之可收 回價值乃其公允值減去出售成 本及使用價值之較高者。如個 別資產未能在大致獨立於其他 資產下賺取現金流量,則就能 獨立賺取現金流量之最小組別 資產(即現金產生單位)釐訂可 收回價值。

倘本集團估計某項資產或現金 產生單位之可收回金額低於其 賬面值,則該項資產之賬面值 須減低至其可收回價值。減值 虧損將即時確認為開支。

倘若某項減值虧損期後撤回, 則該項資產或現金產生單位之 賬面值須增加至重新估計之可 收回價值,惟增加後之賬面值 不得超過在以往年度並無減值 虧損而釐定之賬面值。若減值 虧損撤回時將即時確認為收益。

3. PRINCIPAL ACCOUNTING POLICIES (Continued)

(p) Impairment of other assets, other than goodwill

At the end of each reporting period, the Group reviews internal and external sources of information to assess whether there is any indication that its property, plant and equipment, intangible assets, right-of-use assets, interest in an associate, and interest in joint ventures may be impaired or impairment loss previously recognised no longer exists or may be reduced. If any such indication exists, the recoverable amount of the asset is estimated, based on the higher of its fair value less costs of disposal and value in use. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the smallest group of assets that generates cash flows independently (i.e. a CGU).

If the recoverable amount of an asset or a CGU is estimated to be less than its carrying amount, the carrying amount of the asset or CGU is reduced to its recoverable amount. Impairment losses are recognised as an expense immediately.

A reversal of impairment losses is limited to the carrying amount of the asset or CGU that would have been determined had no impairment loss been recognised in prior years. Reversal of impairment losses is recognised as income in profit or loss immediately.

(q) Borrowing costs

Borrowing costs incurred, net of any investment income on the temporary investment of the specific borrowings, that are directly attributable to the acquisition, construction or production of qualifying assets, i.e. assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets. Capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised as an expense in the period in which they are incurred.

Government grants (r)

Government grants represent incentive grants from the relevant PRC authorities in respect of the running of business by the Group in certain development zones and to encourage the furtherance of such business.

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income over the years necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to profit or loss over the expected useful life of the relevant asset by equal annual instalments.

(s) Leases

Applicable from 1 January 2019

The Group assesses whether a contract is, or contains, a lease at inception of the contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration

As lessee

The Group applies the recognition exemption to short-term leases and low-value asset leases. Lease payments associated with these leases are recognised as an expense on a straightline basis over the lease term.

The Group has elected not to separate non-lease components from lease components, and accounts for each lease component and any associated non-lease components as a single lease component.

The Group accounts for each lease component within a lease contract as a lease separately. The Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component.

Amounts payable by the Group that do not give rise to a separate component are considered to be part of the total consideration that is allocated to the separately identified components of the contract.

The Group recognises a right-of-use asset and a lease liability at the commencement date of the lease.

The right-of-use asset is initially measured at cost, which comprises

- (a) the amount of the initial measurement of the lease liability;
- (b) any lease payments made at or before the commencement date, less any lease incentives received;
- (c) any initial direct costs incurred by the Group; and
- (d) an estimate of costs to be incurred by the Group in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Subsequently, the right-of-use asset is measured at cost less any accumulated depreciation and any accumulated impairment losses and adjusted for any remeasurement of the lease liability. Depreciation is provided on a straight-line basis over the shorter of the lease term and the estimated useful lives of the right-of-use asset (unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or if the cost of the right-of-use asset reflects that the Group will exercise a purchase option — in which case depreciation is provided over the estimated useful life of the underlying asset) as follows:

Properties 1 year to 11 years

- (a) fixed payments (including in-substance fixed payments), less any lease incentives receivable;

(e) payments of penalties for terminating the lease, if the lease term reflects the Group exercising an option to terminate the lease.

The lease payments are discounted using the interest rate implicit in the lease, or where it is not readily determinable, the incremental borrowing rate of the lessee.

Subsequently, the lease liability is measured by increasing the carrying amount to reflect interest on the lease liability and by reducing the carrying amount to reflect the lease payments made.

The lease liability is remeasured using a revised discount rate when there are changes to the lease payments arising from a change in the lease term or the reassessment of whether the Group will be reasonably certain to exercise a purchase option.

The lease liability is remeasured by using the original discount rate when there is a change in the residual value guarantee, the in-substance fixed lease payments or the future lease payments resulting from a change in an index or a rate (other than floating interest rate). In case of a change in future lease payments resulting from a change in floating interest rates, the Group remeasures the lease liability using a revised discount rate.

The Group recognises the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset. If the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Group recognises any remaining amount of the remeasurement in profit or loss.

- (b) the consideration for the lease increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the particular contract.

When a lease modification is not accounted for as a separate lease, at the effective date of the lease modification,

- (a) the Group allocates the consideration in the modified contract on the basis of relative stand-alone price as described above.
- (b) the Group determines the lease term of the modified contract.
- (c) the Group remeasures the lease liability by discounting the revised lease payments using a revised discount rate over the revised lease term.

As lessor

The Group classifies each of its leases as either a finance lease or an operating lease at the inception date of the lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of the underlying asset. All other leases are classified as operating leases.

The Group accounts for each lease component within a lease contract as a lease separately from non-lease components of the contract. The Group allocates the consideration in the contract to each lease component on a relative stand-alone price basis.

As lessor - operating lease

The Group applies the derecognition and impairment requirements in HKFRS 9 to the operating lease receivables.

A modification to an operating lease is accounted for as a new lease from the effective date of the modification, considering any prepaid or accrued lease payments relating to the original lease as part of the lease payments for the new lease.

Applicable before 1 January 2019

Operating leases

Leases which do not transfer substantially all the risks and rewards of ownership to the lessee are classified as operating leases. Rentals payable and receivables under operating leases are charged to profit or loss on a straight-line basis over the lease term of the relevant lease. Lease incentives received are recognised in profit or loss as an integral part of the net consideration agreed for the use of the leased asset. Contingent rentals are recognised as expenses in the accounting period in which they are incurred.

(t) Employee benefits

Short term employee benefits

Salaries, annual bonuses, paid annual leave and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

Defined contribution plans

The obligations for contributions to defined contribution retirement scheme are recognised as expenses in profit or loss as incurred and are reduced by contributions forfeited by those employees who leave the scheme prior the contributions are vested fully in those employees. The assets of the scheme are held separately from those of the Group in an independently administered fund.

Defined benefit plans

The Group's obligation in respect of defined benefit plans is calculated separately for each plan by estimating the ultimate cost of benefit that employees have earned in return for their services in the current and prior periods, which is discounted to determine the present value of those benefits.

The calculation of the obligation is based on the recommendations of the independent qualified actuaries using the projected unit credit method annually. Service cost and interest expense on the net defined benefit liability are recognised in profit or loss. Current services cost is measured as the increase in the present value of the defined benefit liability resulting from employee service in the current period or, where appropriate, the one used to remeasure the net defined benefit liability upon plan amendment, curtailment or settlement to the net defined benefit liability. The rate to discount post-employment benefit obligation is the yield at the end of the reporting period on government bonds that have the currency and terms consistent with the currency and estimated term of the obligations.

Gain or loss on settlement is measured as the difference between a) the present value of the defined benefit obligation being settled and b) any payments made by the Group in connection with the settlement. It is recognised when the settlement occurs.

Remeasurements arising from defined benefit retirement plans are recognised in other comprehensive income and are reflected in equity immediately. Remeasurements comprise actuarial gains and losses, the return on plan assets (excluding amounts included in net interest on the net defined benefit liability (asset)) and any change in the effect of the asset ceiling (excluding amounts included in net interest on the net defined benefit liability (asset)).

(u) Share-based payment transactions

Equity-settled transactions

The Group's employees, including directors, receive remuneration in the form of share-based payment transactions, whereby the employees rendered services in exchange for shares or rights over shares. The cost of such transactions with employees is measured by reference to the fair value of the equity instruments at the grant date. The fair value of share options granted to employees is recognised as a staff cost with a corresponding increase in a share-based payment reserve within equity. The fair value is determined using the binomial model taking into account any market conditions and non-vesting conditions.

The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the vesting conditions are to be fulfilled, ending on the date on which the entitlement of relevant employees to the award is no longer conditional on the satisfaction of any non-market vesting conditions ("vesting date"). During the vesting period, the number of share options that is expected to vest ultimately is reviewed. Any adjustment to the cumulative fair value recognised in prior periods is charged/credited to profit or loss for the year of review, with a corresponding adjustment to the reserve within equity.

Share-based payment transactions in which the Company grants share options to subsidiaries' employees are accounted for as an increase in value of interest in subsidiaries in the Company's statement of financial position which is eliminated on consolidation, with a corresponding credit to the share-based payment reserve within equity.

(v) Taxation

The charge for current income tax is based on the results for the year as adjusted for items that are non-assessable or disallowed. It is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

(v) Taxation (Continued)

For the purposes of measuring deferred tax assets and liabilities arising from investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. If the presumption is rebutted, deferred tax assets and liabilities arising from such investment properties are measured based on the expected manner as to how the property will be recovered.

The deferred tax liabilities and assets are measured at the tax rates that are expected to apply to the period when the asset is recovered or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the end of the reporting period.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, tax losses and credits can be utilised.

Deferred tax is provided on temporary differences arising on interest in subsidiaries, associate and joint ventures, except where the timing of the reversal of the temporary differences is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

CHANGES IN ACCOUNTING POLICIES

Adoption of New/Revised HKFRSs

The HKICPA has issued a number of new/revised HKFRSs that are first effective for the current accounting period of the Group. Of these, the changes in accounting policy relevant to the consolidated financial statements are as follows:

Annual Improvements Project - 2015-2017 Cycle

HKAS 12: Income tax consequences of payments on financial instruments classified as equity

The amendments clarify that (a) the income tax consequences of dividends are recognised in profit or loss, other comprehensive income or equity according to where the past transactions or events that generated the distributable profits were originally recognised and (b) these requirements apply to all income tax consequences of dividends as defined in HKFRS 9.

The adoption of the amendments does not have any significant impact on the consolidated financial statements.

HKAS 23: Borrowing costs eligible for capitalisation

The amendments clarify that (a) if a specific borrowing remains outstanding after the related qualifying asset is ready for its intended use or sale, it becomes part of the funds an entity borrows generally and (b) funds borrowed specifically to obtain an asset other than a qualifying asset are included as part of general borrowings.

The adoption of the amendments does not have any significant impact on the consolidated financial statements.

HK(IFRIC)-Int 23: Uncertainty over Income Tax Treatments

The Interpretation supports the requirements in HKAS 12 Income Taxes by specifying how to reflect the effects of uncertainty in accounting for income taxes.

The adoption of the Interpretation does not have any significant impact on the consolidated financial statements.

香港會計準則第 19 號之修訂:員工福 利

該等修訂要求,對計劃進行修改 後,其餘的結算期則使用已更新之 假設以決定本年度服務成本及淨利 息。

採納該等修訂並無對綜合財務報表 產生重大影響。

香港財務報告準則第9號之修訂:帶 有負賠償的預付款特徵

該等修訂釐清,如果金融資產滿足 特定的條件,帶有負賠償的可預付 金融資產可以按攤銷成本,或指定 按公允價值列賬及在其他全面收益 賬處理計量,代替按公允價值列賬 及在損益賬處理。

採納該等修訂並無對綜合財務報表 產生重大影響。

香港財務報告準則第16號:租賃

香港財務報告準則第16號於2019年 1月1日或之後開始的年度期間年度 取代香港會計準則第17號及相關詮 釋。該採納大幅改變(其中包括)承 租人會計處理並以單一模式取代香 港會計準則第17號下的雙重模式, 因而要求承租人就所有租賃產生多 於12個月的條款之權利及義務確認 使用權資產及租賃負債,除非該等 資產為低價值資產。出租人會計處 理方面,香港財務報告準則第16號 延續了絕大部份香港財務報告準則 第17號出租人會計處理的規定。因 此,出租人會繼續將該租賃分類為 營運租賃或融資租賃,並分別認列 這兩種類型的租賃。香港財務報告 準則第16號亦要求加強承租人和出 租人的披露。

4. CHANGES IN ACCOUNTING POLICIES (Continued)

Adoption of New/Revised HKFRSs (Continued)

Amendments to HKAS 19: Employee Benefits

The amendments require the use of updated assumptions to determine current service cost and net interest for the remainder of the reporting period after a change is made to a plan.

The adoption of the amendments does not have any significant impact on the consolidated financial statements.

Amendments to HKFRS 9: Prepayment Features with Negative Compensation

The amendments clarify that prepayable financial assets with negative compensation can be measured at amortised cost or at fair value through other comprehensive income instead of at FVPL if specified conditions are met.

The adoption of the amendments does not have any significant impact on the consolidated financial statements.

HKFRS 16: Leases

HKFRS 16 replaces HKAS 17 and related Interpretations for annual periods beginning on or after 1 January 2019. It significantly changes, among others, the lessee accounting by replacing the dual-model under HKAS 17 with a single model which requires a lessee to recognise right-of-use assets and lease liabilities for the rights and obligations created by all leases with a term of more than 12 months, unless the underlying asset is of low value. For lessor accounting, HKFRS 16 substantially carries forward the lessor accounting requirements in HKAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently. HKFRS 16 also requires enhanced disclosures to be provided by lessees and lessors.

CHANGES IN ACCOUNTING POLICIES (Continued)

Adoption of New/Revised HKFRSs (Continued)

HKFRS 16: Leases (Continued)

In accordance with the transitional provisions, the Group has applied HKFRS 16 for the first time at 1 January 2019 (i.e. the date of initial application, the "DIA") using the modified retrospective approach in which comparative information has not been restated. Instead, the Group recognised the cumulative effect of initially applying HKFRS 16 as an adjustment to the balance of retained profits or other component of equity, where appropriate, at the DIA.

The Group also elected to use the transition practical expedient not to reassess whether a contract was, or contained, a lease at the DIA and the Group applied HKFRS 16 only to contracts that were previously identified as leases applying HKAS 17 and to contracts entered into or changed on or after the DIA that are identified as leases applying HKFRS 16.

As lessee

Before the adoption of HKFRS 16, lease contracts were classified as operating or finance lease in accordance with the Group's accounting policies applicable prior to the DIA.

Upon adoption of HKFRS 16, the Group accounted for the leases in accordance with the transition provisions of HKFRS 16 and the Group's accounting policies applicable from the DIA.

香港財務報告準則第16號:租賃(續)

作為承租人一以前分類為營運租賃的 租賃

於初次應用日期,本集團把以前分類為營運租賃的租賃確認為資產使用權及租賃負債,除非該等資產為低價值資產,且本集團以逐項租賃基礎應用了以下實際可行權宜方法:

- (a) 對具有合理相似特徵的租賃組 合使用單一折現率。
- (b) 採用香港會計準則第37號並緊接於初次應用日期前確認虧損性租賃撥備,從而於初次應用日期調整使用權資產,作為於初次應用日期進行了減值審查的替代方案。
- (c) 於初次應用日期餘下租期少於 12個月的租賃,不會確認為資 產使用權及租賃負債。
- (d) 在初次應用日期排除初始直接 成本以計量使用權資產。
- (e) 當合約包含延長或終止租約的 選擇時,以事後分析結果確定 租期。

於初次應用日期,除先前使用公允價值模式計量的投資性房地產及已分類於使用權資產,將按照逐項租約以按租賃負債的現值計量,對緊接首次應用日期前確認之租賃相關的任何預付或應付租賃金額進行調整計量。

租賃負債按餘下租賃付款的現值計量,並採用承租人於初次應用日期的新增借賃利率折現。於初次應用日期,適用於租賃負債的加權平均承租人新增借賃利率為4.82%。

4. CHANGES IN ACCOUNTING POLICIES (Continued)

Adoption of New/Revised HKFRSs (Continued)

HKFRS 16: Leases (Continued)

As lessee - leases previously classified as operating leases

The Group recognised right-of-use assets and lease liabilities for leases previously classified as operating leases at the DIA, except for leases for which the underlying asset is of low value, and the Group applied the following practical expedients on a lease-by-lease basis

- (a) Applied a single discount rate to a portfolio of leases with reasonably similar characteristics.
- (b) Adjusted the right-of-use assets at the DIA by the provision for onerous leases recognised immediately before the DIA by applying HKAS 37, as an alternative to performing an impairment review at the DIA.
- (c) Did not recognise right-of-use assets and lease liabilities to leases for which the lease term ends within 12 months of the DIA.
- (d) Excluded initial direct costs from the measurement of the right-of-use assets at the DIA.
- (e) Used hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

At the DIA, except for those that were previously or will be accounted for as investment property using the fair value model, right-of-use assets were, on a lease-by-lease basis, measured at an amount equal to the lease liabilities, adjusted by the amount of any prepaid or accrued lease payments relating to the lease recognised immediately before the DIA.

Lease liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate at the DIA. The weighted average incremental borrowing rate applied to the lease liabilities at the DIA is 4.82%.

(i) 應用會計政策的重要判斷

以下為本公司董事於應用會計 政策過程中所作並對在綜合財 務報表中確認的金額具有重大 影響的重要判斷(涉及估計者 (見下文)除外)。

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and assumptions concerning the future and judgements are made by the management in the preparation of the consolidated financial statements. They affect the application of the Group's accounting policies, reported amounts of assets, liabilities, income and expenses, and disclosures made. They are assessed on an on-going basis and are based on experience and relevant factors, including expectations of future events that are believed to be reasonable under the circumstances. Where appropriate, revisions to accounting estimates are recognised in the period of revision and future periods, in case the revision also affects future periods.

(i) Critical judgement in applying accounting policies

The following is the critical judgement, apart from those involving estimations (see below), that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

5. 關鍵會計估計及判斷(續)

(i) 應用會計政策的重要判斷(續)

遞延税項負債

為計算使用公允值模式計量的 投資性房地產的遞延税項負 債,本公司董事已審閱本集團 的投資房地產組合,並認為本 集團的投資性房地產乃誘過目 標是隨時間而非透過銷售消耗 投資性房地產中的絕大部分經 濟利益的業務模式持有。因 此,於計算本集團投資性房地 產的遞延税項時,本公司董事 已釐定使用公允值模式計量的 投資性房地產的賬面值將全數 诱猧出售收回的假設被推翻。 所以,本集團並沒有確認有關 於位於中國投資性房地產公允 值變動的土地增值税但假設這 些投資性房地產確認遞延稅項 將會透過使用而收回。

遞延所得稅負債並無包括本集 團於中國某些實體將要支付未 分配利潤之預提稅,因該等利 潤於可見將來不預期會被分 配。遞延所得稅負債詳情於綜 合財務報表附註36披露。

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (Continued)

(i) Critical judgement in applying accounting policies

(Continued)

Deferred tax liabilities

For the purposes of measuring deferred tax liabilities arising from investment properties that are measured using the fair value model, the directors have reviewed the Group's investment property portfolio and concluded that the Group's investment properties are held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, in measuring the Group's deferred taxation on investment properties, the directors have determined that the presumption that the carrying amounts of investment properties measured using the fair value model are recovered entirely through sale is rebutted. As a result, the Group has not recognised deferred taxes on land appreciation taxes in respect of changes in fair value of investment properties situated in the PRC but has recognised deferred tax on income tax on the assumption that these investment properties will be recovered through use.

Deferred tax liabilities have not been provided for the withholding tax that would be payable on the undistributed earnings of certain entities of the Group in the PRC as those earnings are not expected to be distributable in the foreseeable future. Details of deferred tax liabilities are disclosed in note 36 to the consolidated financial statements.

包含延長及/或終止選擇權之 合約之租期-作為出租人及承 租人

本集團將租期釐定為租賃不可 撤銷之期間,包括由延長選擇 權涵蓋之期間(倘本集團合理確 定將行使延長選擇權)及由終止 選擇權涵蓋之期間(倘承和人合 理確定不會行使終止選擇權)。

本集團擁有包括延長及終止選 擇權之和賃合約。在評估本集 團是否合理確定將行使選擇權 延長租賃或不會行使選擇權終 止租賃時,本集團會作出判 斷,並考慮所有能形成經濟誘 因促使其延長或終止租賃之相 關事實及情況。

於開始日期後,倘發生在承租 人控制範圍內並影響承租人是 否合理確定將行使延長選擇權 或不會行使終止選擇權之重大 事件或重大情況變動,則本集 團重新評估租期。

租賃之識別

於合約開始時,本集團根據香 港財務報告準則第16號之規定 及所有相關事實及情況評估合 約是否屬於(或包含)租賃。具 體而言,本集團透過應用重大 實質替代權之概念,評估合約 是否涉及已識別資產之使用。 此外,本集團釐定哪一方擁有 與改變資產用途及目的至關重 要之決定權,從而評估到底是 本集團抑或客戶有權主導已識 別資產之使用。倘有關決定已 預先作出,則考慮經營有關資 產之權利或有否透過設計資產 加入有關決定。

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Critical judgement in applying accounting policies (i) (Continued)

Lease terms of contracts with extension and/or termination options - as lessor and lessee

Lease terms are determined as the non-cancellable period of a lease, including periods covered by an option to extend if the Group is reasonably certain to exercise the extension option, and periods covered by an option to terminate if the lessee is reasonably certain not to exercise the termination option.

The Group has lease contracts that include extension and termination options. In assessing whether the Group is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, the Group applies judgement and considers all relevant facts and circumstances that create an economic incentive to extend or terminate the leases.

After the commencement date, the Group reassesses the lease term upon the occurrence of a significant event or a significant change in circumstances that is within the control of the lessee and affects whether the lessee is reasonably certain to exercise an extension option or not to exercise a termination option.

Identification of leases

At the inception of a contract, the Group assesses whether a contract is, or contains, a lease based on the requirements of HKFRS 16 and all the relevant facts and circumstances. In particular, the Group assesses whether the contract involves the use of an identified asset by applying the concept of substantive substitution right. Also, the Group assesses whether the Group or the customer has the right to direct the use of the identified asset with reference to determination of which party has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In cases where such decisions are predetermined, the right to operate the asset or the incorporation of such decisions by means of designing the asset are considered.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (Continued)

(ii) Key sources of estimation uncertainty

Loss allowance for ECL

The Group's management estimates the loss allowance for trade receivables by using various inputs and assumptions including risk of a default and expected loss rate. The estimation involves high degree of estimation and uncertainty which is based on the Group's historical information, existing market conditions as well as forward-looking estimates at the end of each reporting period. Where the expectation is different from the original estimate, such difference will impact the carrying amount of trade receivables. Details of the key assumption and inputs used in estimating ECL are set out in note 45 to the consolidated financial statements.

Useful lives and impairment of property, plant and equipment and right-of-use assets

The directors review the residual value, useful lives and depreciation/amortisation method of property, plant and equipment and right-of-use assets at the end of each reporting period, through careful consideration with regards to expected usage, wear-and-tear and potential technical obsolescence to usage of the assets.

In determining whether an asset is impaired or the event previously causing the impairment no longer exists, the directors have to assess whether an event has occurred that may affect the asset value or such event affecting the asset value has not been in existence. If any such indication exists, the recoverable amounts of the asset would be determined by reference to value in use and fair value less costs of disposal. Value in use is determined using the discounted cash flow method. Owing to inherent risk associated with estimations in the timing and magnitude of the future cash flows and fair value less costs of disposal, the estimated recoverable amount of the asset may be different from its actual recoverable amount and profit or loss could be affected by accuracy of the estimations.

(ii) 主要估計不確定性的來源(續)

公允值計量和評估流程

如綜合財務報表附註14和46 內所描述,外部各方就級別二 及級別三之資產或負債所採用 的估值方法乃得到管理層同 意。管理層運用其判斷以決定 該等估值方法及假設是否適合 應用於本集團之情況。於評估 級別三資產之公允值時包含若 干假設並無可觀察之市場價格 及利率支持。假設的變動會影 響綜合財務狀況表內已呈報之 公允值。

商譽減值

本集團至少每年確定商譽是否 減值。這需要估計分配商譽的 現金產牛單位的使用價值。估 計使用價值需要本集團對現金 產生單位的預期現金流量進行 估計,並選擇合適的折現率以 計算這些現金流量的現值。用 以計算可收回金額之估計詳情 載於綜合財務報表附註19。

計算租賃負債之折現率-作為 承租人

由於租賃隱含之利率難以釐 定,本集團使用承租人新增借 貸利率折現未來租賃付款。在 釐定租賃之折現率時,本集團 使用可觀察到之利率作為出發 點,再作出判斷並調整有關可 觀察利率以釐定新增借貸利

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Key sources of estimation uncertainty (Continued) (ii)

Fair value measurements and valuation processes

As described in notes 14 and 46 to the consolidated financial statements, the valuation techniques applied by various external parties for the level 2 and level 3 assets or liabilities have been agreed with the management of the Company. The management determined whether valuation techniques and assumptions applied are appropriate to the circumstances of the Group. The estimation of fair value of level 3 assets included some assumptions not supported by observable market prices or rates. Change in assumption could affect the reported fair value of the assets and liabilities in the consolidated statement of financial position.

Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the CGU to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected cash flows from the CGU and also to choose a suitable discount rate in order to calculate the present value of those cash flows. Details of the estimates used to calculate the recoverable amount are given in note 19 to the consolidated financial statements.

Discount rates for calculating lease liabilities – as lessee

The Group uses the lessee's incremental borrowing rates to discount future lease payments since interest rates implicit in the leases are not readily determinable. In determining the discounts rates for its leases, the Group refers to a rate that is readily observable as the starting point and then applies judgement and adjusts such observable rate to determine the incremental borrowing rate.

6. REVENUE AND SEGMENT INFORMATION

The Company's executive directors have been identified as the chief operating decision-maker of the Group. The Group has identified its operating segments and prepared segment information based on the regular internal financial information reported to the Company's executive directors for their decisions about resources allocation to the Group's business components and review of these components' performance. The Company's executive directors consider the business principally from a product perspective which forms a basis for business segment information as over 99% of the Group's revenue and business are conducted in the PRC from a geographical perspective. Business reportable operating segments identified are instant noodles, beverages and others. The segment of others includes instant food, investment holding, properties investment for rental purpose, logistics and supportive functions.

Starting from current year, the Group focuses on the operating decisions and the performance evaluation of two reportable segments which are Instant noodles and Beverages. Instant food is no longer considered as a separate reportable segment and has been included in others. As a result of the above re-alignment, comparative figures presented have also been restated to conform to current year's presentation.

For the purposes of assessing the performance of the operating segments and allocating resources between segments, the executive directors assess the performance of reportable segments based on profit for the year and profit before taxation, share of results of an associate and joint ventures and unallocated income (expenses), net.

Segment assets include all assets with the exception of interest in an associate and joint ventures and unallocated assets which include financial assets at FVPL and Designated FVOCI. Segment liabilities include all liabilities with the exception of employee benefit obligations.

REVENUE AND SEGMENT INFORMATION (Continued)

Inter-segment sales are priced at cost plus profit margin. The accounting policies of the reporting segments are the same as the Group's accounting policies as described in note 3 to the consolidated financial statements.

The geographical location of the Group's customers is based on the location at which the goods are delivered. Over 99% of the revenues from external customers of the Group are attributable to customers located in the PRC, the place of domicile of the Group's operating entities. Meanwhile, all of the Group's non-current assets, other than certain financial assets at FVPL and Designated FVOCI, are located in the PRC.

No revenue from a single external customer amounted to 10% or more of the Group's revenue.

In estimating the fair values of investment properties, it is the Group's policy to engage an independent professional qualified valuer to perform the valuation. The management works closely with the independent professional qualified valuer to establish the appropriate valuation technique and inputs to the model. The valuations have been arrived at using income capitalisation approach. In the valuation, the market rentals of all lettable units of the commercial properties are assessed by reference to the rentals achieved in the lettable units as well as other lettings of similar properties in the neighbourhood. The capitalisation rate adopted is made by reference to the yield rates observed by the valuer for similar properties in the locality and adjusted based on the valuer's knowledge of the factors specific to the respective properties. In estimating the fair value of the properties, the highest and best use of the properties is their current use.

商譽產生的原因是,為收購付出的 代價實際上包括了與收入增長,未 來市場發展和被收購企業的組合勞 動力相關的收益。這些利益不與商 譽分開確認,因為它們不符合可識 別無形資產的確認標準。預計所有 商譽都不可抵扣所得税。

商譽賬面值根據業務性質分配至本 集團現金產生單位(「現金產生單 位」)進行減值測試:

Goodwill arose because the consideration paid for the acquisition effectively included amount in relation to the benefits originated from revenue growth, future market development and the assembled workforce of the acquired business. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets. None of the goodwill recognised is expected to be deductible for income tax purposes.

The carrying amount of goodwill was allocated to the Group's CGU identified according to the nature of business as follows for impairment test:

由飲品業務產生的商譽(「飲品現金 產生單位」)指於2017年收購杭州百 事可樂飲料有限公司(「杭州百事可 樂」) 25%股權,於2019年12月31 日,本集團參考杭州百事可樂的現 金流量,預測評估飲料現金產生單 位的可收回金額。計算採用基於董 事會批准的五年期財務預算的現金 流量預測。超過5年的現金流量已經 以2%(2018:2%)的長期增長率推 算出來。這個增長率是基於相關的 行業增長預測,並不超過相關行業 的平均長期增長率。

飲品現金產生單位根據使用價值計 算的可收回金額超過其賬面值,因 此商譽沒被減值。

Goodwill arising from the beverages business (the "Beverages CGU") represented the acquisition of 25% equity interests in Hangzhou Pepsi-cola Beverage Co., Limited ("HZPS") in 2017. At 31 December 2019, the Group assessed the recoverable amount of the Beverages CGU with reference to the cash flow projection of HZPS. The calculation uses cash flow projection based on financial budgets approved by the board of directors covering a 5-year period. Cash flows beyond the 5-year period have been extrapolated using a 2% (2018: 2%) long-term growth rate. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry.

The recoverable amount of the Beverages CGU based on the value-in-use calculation exceeded its carrying amount. Accordingly, goodwill was not impaired.

管理層根據過往表現及其對市場發展的預期釐定預算毛利率,所使用的折現率為稅前,並反映與飲品現金產生單位有關的特定風險。

除上述釐定飲料現金產生單位可收 回金額之情況外,本公司管理層並 不知悉有任何其他可能需要更改主 要假設之變動。

重大的判斷和假設

Management determined the budgeted gross profit margin based on past performance and its expectation of market development. The discount rate used is pre-tax and reflects specific risks relating to the Beverages CGU.

Apart from the considerations described above in determining the recoverable amount of the Beverages CGU, the Company's management is not aware of any other probable changes that would necessitate changes in the key assumptions.

20. SUBSIDIARIES

Details of principal subsidiaries at 31 December 2019 are shown in note 49 to the consolidated financial statements.

None of the subsidiaries had any debt securities outstanding during the year or at the end of the reporting period.

Significant judgements and assumptions

In 2017, PepsiCo Investment (China) Ltd. ("PICL"), a non-wholly owned subsidiary of the Company, entered into the sale and purchase agreement (the "SPA") with one of the shareholders (the "Vendor") of HZPS to acquire 25% equity interest in HZPS from the Vendor. In addition, the Vendor also issued an authorisation letter (the "Authorisation Letter") to PICL under which PICL shall be entitled irrevocably all the rights and benefits of the aforesaid 25% equity interest in HZPS currently held by the Vendor for a period up to the completion date of the registration of the equity transfer (the "Equity Transfer"). At the end of the reporting period, the management estimated that the registration of the Equity Transfer with the relevant government authority will be completed not later than the end of 2021.

Through the execution of the SPA and Authorisation Letter, the Group holds 50% equity interest in HZPS and has more than a majority of the voting rights of HZPS. Since the relevant activities which significantly affect HZPS's return are determined by the board of directors of HZPS based on a simple majority vote, the management concluded that the Group has control over HZPS and HZPS is treated as a subsidiary of the Group.

22. 合營公司權益(續)

重大的判斷及假設

本集團透過一間全資附屬公司持有康普(蘇州)食品有限公司60%的屬宗權。然而,根據該全資附屬公司先發屬之間的合同協議,與另一投資者之間的合同協議,對被投資回報有重大影響的相關業務須經所有投資者一致決定。因此權何樂團認為對該實體不擁有控制權。

本集團透過一間直接持有濟南百事 80%股本權益之非全資擁有附屬公 司而持有濟南百事62.33%之實際擁 有權權益。然而,根據該非全資擁 有附屬公司與其他投資者之間的合 同協議,對投資回報有重大影響的 相關活動須獲得濟南百事可樂飲料 有限公司董事會超過80%的投票權 表決一致。根據合約權利,本集團 在濟南百事的5名董事內雖可任命4 名董事,但凡涉及與濟南百事之經 濟業務相關的財務策略和營運決策 時則須要該非全資擁有附屬公司和 其他投資者取得一致決定,因此本 集團認為其於濟南百事並無擁有控 制權但擁有共同控制權。

22. INTEREST IN JOINT VENTURES (Continued)

Significant judgements and assumptions

The Group has 60% voting rights in Kangpu (Suzhou) Food Co., Ltd. through a wholly owned subsidiary. However, based on a contractual agreement between the wholly owned subsidiary and another investor, the relevant activities which significantly affect the investee's return require the unanimous consent of all investors. Therefore, the Group determined that it has no control but joint control over this entity.

The Group has 62.33% effective ownership interest in JNPS through a non-wholly owned subsidiary, which holds 80% direct equity interests in JNPS. However, based on the contractual agreement between the non-wholly owned subsidiary and other investor of JNPS, the relevant activities which significantly affect the JNPS's return require over 80% votes of the board of directors of JNPS. By virtue of the Group's contractual right to appoint 4 out of 5 directors to the board of directors of JNPS, the Group has determined that it has no control but joint control over JNPS as the strategic financial and operating decisions relating to the economic activities of JNPS require the unanimous consent of the non-wholly owned subsidiary and the other investor.

The fair value of the share options granted is measured at the date of grant, using the binomial option pricing model, taking into account the terms and conditions of the share-based arrangement. The fair value calculated is inherently subjective and uncertain due to the assumptions made and the limitations of the model used. The inputs into the model are as follows:

	汉 」,日 之	12 7. 日 之					
	公允值	收市價					
	每股/港元	每股/港元	行使價格	無風險情況

Other actuarial assumptions may also change with the above assumptions. Such change is not accounted for in the above analyses. The projected unit credit method is used to determine the present value of the defined benefit obligations and the related current service cost and where applicable the past service cost. 根據企業所得税法,外國投資者從 位於中國的外商投資企業所獲得的 股息須按照10%的税率徵收預提 税。該規定於2008年1月1日起生 效,適用於2007年12月31日後始 累計可供分配利潤。倘中國政府與 該外國投資者所處國家或地區政府 存在税收安排,可適用較低税率。

本集團的內地附屬公司的適用税率 為10%。本集團根據各集團公司預 期在可見將來中的淨可供分配利潤 而計提相關的遞延税項負債。 Pursuant to the PRC Enterprise Income Tax Law, a 10% withholding tax is levied on dividends distributed to foreign investors by the foreign investment enterprises established in the PRC. The requirement is effective from 1 January 2008 and applies to earnings accumulated after 31 December 2007. A lower withholding tax rate may be applied if there is a tax treaty between the PRC and jurisdiction of the foreign investors.

For the Group's PRC subsidiaries, the applicable rate is 10%. Deferred tax liability is provided on the basis that the undistributed earnings of the Group's entities are expected to be distributed in the foreseeable future.

36. 遞延税項(續)

估計餘下淨利潤(「餘下淨利 潤」)的預提税影響約為人民幣 1,728,487,000元(2018年: 人 民 *幣 1,648,467,000 元)*,當其分發時 將須繳納税項。董事認為目前為止 該等餘下淨利潤須留作各集團公司 之營運資金,並在可見將來不作分 配,因此並無作出額外遞延税撥備。

於結算期內,本集團已將人民幣 111,128,000元(2018年: 人民幣 111,128,000元)稅務虧損確認為遞 延税項資產。税務虧損可用作抵扣 由該等虧損產生起計未來五年間之 税務收益。於結算日,未確認遞延 税項資產之税務虧損到期年份如下:

The estimated withholding tax effects on the undistributed earnings (the "Remaining Net Earnings") is approximately RMB1,728,487,000 (2018: RMB1,648,467,000) which would become payable when they are distributed. In the opinion of the directors, the Remaining Net Earnings, at the present time, are required for financing the continuing operations of these entities and no distribution would be made in the foreseeable future. Accordingly, no provisions for additional deferred taxation have been made.

Deferred tax assets in respect of tax losses of RMB111,128,000 (2018: RMB111,128,000) were recognised as at the end of reporting period. 44. CAPITAL MANAGEMENT

The Group's objectives on managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

The Group monitors its capital, which comprises all equity components, using a gearing ratio which is calculated on the basis of net debt (interest-bearing borrowings net of cash and cash equivalents) as a ratio of the equity attributable to owners of the Company. The debt-to-equity ratio at the end of the reporting period was as follows:

		2019	2018

本集團通過優化債務和權益結餘, 積極定期檢討和管理資本結構,並 根據經濟狀況的變化調整資本結 構,通過派發股息,償還現有債 務,發行新債務以及未使用的土地 和財產的出售,考慮市場借貸利率 變動,未來資本支出和投資機會。

於2019年,本集團的策略與2018 年相同,旨在將淨負債減至零餘額。

The Group actively and regularly reviews and manages its capital structure through the optimisation of the debt and equity balance and makes adjustments to capital structure according to changes in economic conditions for achieving its objectives through payment of dividends, retire of existing debts, issue of new debts and sales of lands and properties not in use. Changing of borrowing rate in the market, future capital expenditures and investment opportunities are taken into consideration.

During 2019, the Group's strategy, which was unchanged from 2018, aims at minimising the net debt approximately to nil balance.

45. 金融風險因素

本集團所持有的金融工具面對外匯 風險、利率風險、信貸風險及流動 資金風險。為降低本集團金融風 險,董事會採用保守的風險管理對 策。董事會檢討並同意採用之風險 管理對策如下:

外滙風險

本集團於2019年及2018年12月31 日以外幣(非人民幣)計值的按公允 價值列賬及在損益賬處理的金融資 產、現金及現金等值物、有息借貸 及應付賬款詳情分別載於綜合財務 報表附註23,28,34及37。

45. FINANCIAL RISK MANAGEMENT

The Group's financial instruments expose it to foreign currency risk, interest rate risk, credit risk and liquidity risk. The Board of Directors generally adopts conservative strategies on its risk management and limits the Group's exposure to these risks to a minimum. The Board of Directors reviews and agrees policies for managing each of these risks and they are summarised below:

Foreign currency risk

The majority of the subsidiaries of the Group are operated in the PRC and most of their transactions are denominated in RMB. The Group is exposed to foreign currency risk primarily through payable on capital expenditures, purchases, bank balances, interest-bearing borrowings, financial assets at FVPL, financial liabilities at FVPL and related party balances that are denominated in currencies other than the functional currency of the Company or its subsidiaries.

The exchange rate of RMB against US\$ is subject to the rules and regulations of foreign exchange control promulgated by the PRC government. The Group did not have significant exposure to foreign exchange risk arising from daily operating activities of the subsidiaries because their main operations are conducted in their functional currency. Considered the diverged trends of the exchange rates between RMB and the US dollars and the Group itself, the Group has adopted a financing strategy to increase the PRC subsidiaries proportion of on shore financing and to reduce their foreign currencies financing. During the year, the Group has not entered into significant hedging activities to hedge against the exposure to foreign currency risk.

Details of the Group's financial assets at FVPL, cash and cash equivalents, interest-bearing borrowings and trade payables denominated in currencies other than RMB as at 31 December 2019 and 2018 are set out in notes 23, 28, 34 and 37 to the consolidated financial statements respectively.

45. 金融風險因素(續)

外滙風險(續)

於結算日,倘所有其他變數保持不 變,而人民幣兑換美元、人民幣兑 新台幣及人民幣兑換歐元分別升 值 / 貶 值2.4%、1.3%、及2.3% (2018年:分別為5.5%、3.4%、及 5.3%),本年度集團溢利及保留溢 利將增加/減少人民幣2,357,000元 (2018年:人民幣3,745,000元)。

敏感度分析假設外幣兑換率於結算 日出現變動並應用於本集團所有於 該日期存在之金融工具的貨幣風 險,而所有其他變數(特別是利率) 保持不變。列出之變動代表管理層 評估外幣兑換率於期內至下一年度 結算日之可能出現之變動。此分析 基準與2018年相同。

利率風險

本集團主要面對的利率風險是來自 銀行結餘及有息借貸令本集團面對 利率風險。浮動利率銀行結餘及浮 動利率有息借貸令本集團面對現金 流量利率風險。對於有息借貸,本 集團的策略是根據經濟環境及集團 策略把定息借貸及浮息借貸保持在 適當比例。

期內,本集團並未進行重大對沖活 動,以對沖現金流量及公允價值的 利率風險。於結算期,本集團在固 定 利 率 之 借 款 為14%(2018年: 24%)。

45. FINANCIAL RISK MANAGEMENT (Continued)

Foreign currency risk (Continued)

At the end of the reporting period, if the exchange rates of RMB/ US\$, RMB/NTD and RMB/EUR had strengthened/weakened by 2.4%, 1.3% and 2.3% respectively (2018: 5.5%, 3.4% and 5.3% respectively) with all other variables held constant, the Group's profit for the year and retained profits would have been RMB2,357,000 (2018: RMB3,745,000) higher/lower.

The sensitivity analysis has been determined assuming that the change in foreign exchange rates had occurred at the end of the reporting period and had been applied to Group's exposure to currency risk for all financial instruments in existence at that date, and that all other variables, in particular interest rates, remain constant. The stated changes in foreign currency represent management's assessment of reasonably possible changes in foreign exchange rates over the period until the next annual end of the reporting period. The analysis was performed on the same basis for 2018.

Interest rate risk

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's bank balances and interestbearing borrowings. Bank balances and interest-bearing borrowings with floating interest rates expose the Group to cash flow interest rate risk. For interest-bearing borrowings, the Group's policy is to manage its interest cost using a mix of fixed and floating rate debts, monitor closely its interest rate exposure and the level of fixed rate and floating rate borrowings in consideration of economic atmosphere and the strategies of the Group.

During the year, the Group has not entered into significant hedging activities to hedge against the exposure to cash flow and fair value interest rate risk. At the end of the reporting period, the Group's borrowings at fixed rate of interest was 14% (2018: 24%).

45. 金融風險因素(續)

利率風險(續)

於結算日,倘所有其他變數保持不變,以美元及人民幣列值之銀行結餘及有息借貸利率分別調升/調低75(2018年:100)及30(2018年:50)基點,本年度集團溢利及保留溢利將減少/增加人民幣20,897,000元(2018年:減少/增加人民幣8,538,000元)。

敏感度分析假設利率於年內出現變動並應用於本集團於年內存在之銀行結餘及有息借貸的利率風險。以美元及人民幣列值之銀行結餘及有息借貸分別調升或調低75(2018年:100)及30(2018年:50)基點,代表管理層評估利率於期內至下一年度結算日之可能出現之變動。此分析基準與2018年相同。

45. FINANCIAL RISK MANAGEMENT (Continued)

Interest rate risk (Continued)

At the end of the reporting period, if interest rates of bank balances and interest-bearing borrowings denominated in US\$ and RMB had been 75 (2018: 100) and 30 (2018: 50) basis point higher/lower respectively and all other variables were held constant, the Group's profit for the year and retained profits would decrease/increase by RMB20,897,000 (2018: decrease/increase by RMB8,538,000).

The sensitivity analysis above has been determined assuming that the change in interest rates had occurred throughout the year and had been applied to the exposure to interest rate risk for bank balances and interest-bearing borrowings in existence during the year. The 75 (2018: 100) and 30 (2018: 50) basis point increase or decrease on the bank balances and interest-bearing borrowings denominated in US\$ and RMB respectively represent management's assessment of a reasonably possible change in interest rates over the period until the next annual end of the reporting period. The analysis was performed on the same basis for 2018.

Credit risk

The Group's credit risk is primarily attributable to long-term time deposits, cash and cash equivalent and trade and other receivables. Substantially all of the Group's long-term time deposits, pledged bank deposits and cash and cash equivalents were deposited in the creditworthy global financial institutions and state-controlled financial institutions in the PRC, which management considers they are without significant credit risk. The carrying amount of financial assets recognised on the consolidated statement of financial position, which is net of loss allowance, represents the Group's exposure to credit risk without taking into account the value of any collateral held or other credit enhancements.

Trade receivables

The majority of the Group's sales are conducted on a cash basis. The Group has implemented policies to ensure that sales of products are made to direct retailers, who wish to trade on credit terms, with an appropriate credit history which is subject to periodic reviews. Individual credit evaluations are performed on all customers requiring credit over a certain amount.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The default risk of the industry and country in which customers operate also has an influence on credit risk but to a lesser extent.

The Group's customer base consists of a wide range of clients and the trade receivables are categorised by common risk characteristics that are representative of the customers' abilities to pay all amounts due in accordance with the contractual terms. The Group applies a simplified approach in calculating ECL for trade receivables and recognises a loss allowance based on lifetime ECL at each reporting date and has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment. The expected loss rate used in the Group's estimation on ECL is calculated for each category based on actual credit loss experience over the past three years and adjusted for current and forward-looking factors to reflect differences between economic conditions during the period over which the historical data has been collected, current conditions and the Group's estimate on future economic conditions over the expected lives of the receivables. The management considered that these factors do not indicate any significant credit risk and additional loss allowance for provision for trade receivables as at 1 January and 31 December 2019 and 2018 to be insignificant. There was no change in the estimation techniques or significant assumptions made during the year.

45. FINANCIAL RISK MANAGEMENT (Continued)

Credit risk (Continued)

Trade receivables (Continued)

The trade receivables as at 31 December 2019 and 2018 that were past due but not impaired related to a number of independent customers that had a good track record with the Group. The Group had not impaired these debtors as there had not been a significant change in credit quality and the directors believed that the amounts would be fully receivable.

Receivables that were neither past due nor impaired relate to a wide range of customers for whom there was no recent history of default.

The Group does not hold any collateral over trade receivables as at 31 December 2019 (2018: Nil).

Amounts due from an associate, joint venture and related parties

The Group considers that the amounts due from an associate, joint ventures and related parties, no matter it is trade receivable or non-trade receivable, have low credit risk based on the counterparties' strong capacity to meet its contractual cash flow obligations in the near term and low risk of default. Impairment on amounts due from these parties is measured on 12-month ECL and reflects the short maturities of the exposures. At 31 December 2019, the additional loss allowance for provision for amounts due from these parties was insignificant.

Credit risk (Continued)

Loan and other receivables

The Group performs impairment assessment on loan and other receivables from various parties based on 12-month ECL. The credit risk of the Group's loan and other receivables arises from default of the counterparties, with maximum exposure equal to the carrying amounts of these receivables. Individual credit limits are set based on the assessments of the credit quality.

In estimating the ECL, the Group has taken into account the historical actual credit loss experience and the financial position of the counterparties, past collection history, current creditworthiness, adjusted for forward-looking factors that are specific to the debtors and general economic conditions of the industry in which the counterparties operate, in estimating the probability of default of these financial assets, as well as the loss upon default in each case. The management of the Group considers the ECL of these financial assets to be insignificant after taking into account the financial position, credit quality of the counterparties and past settlement records. There was no change in the estimation techniques or significant assumptions made during the year.

At the end of the reporting period, the Group had a concentration of credit risk as 89.29% (2018: 85.92%) of loan receivables which was due from the Group's largest debtor, and 100% of loan receivables (2018: 100%) was due from the Group's five largest debtors.

Financial assets and liabilities carried at fair value (a)

The following table presents the financial assets and liabilities measured at fair value or required to disclose their fair value in these consolidated financial statements on a recurring basis at 31 December 2019 across the three levels of the fair value hierarchy defined in HKFRS 13, Fair Value Measurement, with the fair value measurement categorised in its entirety based on the lowest level of input that is significant to the entire measurement. > (i) 按FVPL處理的金融資產: 投資基金

> > 截至2019年12月31日,本集團有四個按公允價值列賬及在損益賬處理的金融資產的投資基金主要包括被分類為公允價值層級的級別3(2018年:四個級別3)。

在級別3其中一項投資基 金的公允值是基於投資 經理於結算日向投資者 報告之投資基金資產淨 額估計。級別3其餘三個 (2018年:三個)之投資 基金之公允值是根據基金 所投資的公司的公允價值 估計。所有級別3之投資 基金均包括上市投資和非 上市投資。上市投資的 公允值估計是參考市場 報價,而非上市投資的 公允值是由有關基金經理 利用包括平均EBITDA模 型及市銷率模型在內的估 價技術作評估。評估非上 市公司的公允值時包括一 些非由可觀察市場價格或 比率支持之假定,包括 年度預期增長率由-9% 至8%(2018年:-8% 至2%)、平均EBITDA 模型及可比較公司之平 均市銷率分別由5至22 倍(2018: 4.1倍至21.7 倍)及由1.40倍至1.62倍 (2018: 1.18至1.35倍)。

Valuation techniques and significant inputs used in Level 2 and Level 3 fair value measurement

(i) Financial assets at FVPL: Investment funds

As at 31 December 2019, the Group's financial assets at FVPL mainly comprise four investment funds which are categorised as Level 3 (2018: four Level 3) of the fair value hierarchy.

The fair value of one of the investment funds in Level 3 is estimated based on the net asset value of the investment fund reported to the investors by the investment manager as at the end of the reporting period. For the remaining three (2018: three) investment funds in Level 3, their fair values are estimated based on the fair values of the companies invested by the funds. All of the investment funds in Level 3 included both listed investments and unlisted investments. The fair values of listed investments are estimated with reference to quoted market price, while the fair values of unlisted investments are estimated by the respective investment managers using valuation techniques including mainly average earnings before interest, tax and amortisation (EBITDA) multiple model and price/sales (P/S) multiple model. In determining the fair value of unlisted investments, it includes assumptions that are not supported by observable market prices or rates. The expected annual growth rates of unquoted companies invested by the funds ranging from -9% to 8% (2018: -8% to 2%), average EBIDTA multiple and average price/ sales (P/S) multiples of comparable companies of the corresponding industries ranging from 5 to 22 times (2018: from 4.1 to 21.7 times) and ranging from 1.40 to 1.62 times (2018: 1.18 to 1.35 times) respectively.

(ii) 按FVPL處理的金融資產: 非上市股本證券

> 非上市股本證券之公允價 值乃經參考相關股本證券 之資產淨值後釐定。

(iii) 指定FVOCI: 非上市股本 證券

> 在級別3之一項於期內投 資的非上市股本證券的 公允值是由投資經理利 用市銷率模型作釐定。評 估非上市之股本證券的公 允值時包括一些由非可觀 察市場價格或比率支持之 假定,包括預期增長率為 0%(2018年:-1%)及可 比較公司之平均市銷率為 1.40倍(2018年:1.18 倍)。

(iv) FVPL處理之金融負債:應 付或有代價

> 級別三應付或有代價之公 允價值乃根據預期付款金 額及其相關概率採用收益 法釐定。 適當時,折扣至 現值。董事認為,將一項 或多項投入改為合理可能 的替代假設不會顯著改變 公允價值。

46. FAIR VALUE MEASUREMENTS (Continued)

Financial assets and liabilities carried at fair value (Continued)

Financial assets at FVPL: Unlisted equity securities

The fair value of unlisted equity securities is determined with reference to the net assets value of the underlying equity securities.

Designated FVOCI: Unlisted equity securities

The fair value of the unlisted equity securities in Level 3 are mainly determined by the investment manager using price/sales (P/S) multiple model. In determining the fair value of the unlisted equity securities, it includes assumptions that are not supported by observable market prices or rates, including expected annual growth rates of 0% (2018: -1%) and comparable companies' average P/S multiples of 1.40 times (2018: 1.18 times).

(iv) Financial liabilities at FVPL: Contingent consideration payable

The fair value of contingent consideration payable in Level 3 is determined by using the income approach based on the expected payment amounts and their associated probabilities. When appropriate, it is discounted to present value. In the opinion of the directors, changing one or more of the inputs to reasonably possible alternative assumptions would not change the fair value significantly.

46. FAIR VALUE MEASUREMENTS (Continued)

(a) Financial assets and liabilities carried at fair value (Continued)

Valuation processes used in Level 3 fair value measurement

In estimating the fair value of investment fund and unlisted equity securities within Level 3 of the fair value hierarchy, the Group uses market observable-data to the extent it is available. Where Level 1 inputs are not available, the Group obtains the valuations provided by the respective investment managers or trust administrator for the investment funds.

The Group's finance department includes a team that reviews the valuations performed by the investment managers or trust administrator of the investment funds for financial reporting purposes. The team reports directly to the senior management. Discussions of valuation processes and results are held between the management, investment managers or trust administrator of the investment funds at least once every year. At each financial year end, the finance department works closely with the investment managers or trust administrator of the investment funds to establish the appropriate valuation techniques and inputs to the valuation models, verifies all major unobservable inputs in the valuations, assesses valuations movements when compared to the prior year valuation report and holds discussions with the investment managers or trust administrator of the investment funds.

(b) Fair values of financial assets and liabilities carried at other than fair value

In the opinion of the directors, no other financial assets and liabilities of the Group are carried at amount materially different from their fair values as at 31 December 2019.
