During the Year under Review, the global macroeconomic environment remained complex and challenging, along with escalating geopolitical conflicts. The international trade landscape underwent profound adjustments, and the restructuring of global industrial chains further accelerated. During 2024, the domestic manufacturing industry exhibited a bifurcated trend: traditional sectors such as real estate and related upstream and downstream sectors continued to undergo significant adjustments, with ongoing contraction in fixed asset investments, while strategic sectors such as new energy vehicles, high-end equipment and semiconductors maintained growth momentum with the support of national industrial policies. In general, after adjustments spanning the second half of 2022 and the full year of 2023, the manufacturing industry's demand for CNC machine tools began to gradually recover from a suppressed state, propelling the CNC machine tools market into an upward cycle. Especially in the automotive industry, beyond the recovery of basic demand, certain leading automobile manufacturers optimized and integrated resources within their supply chains to gain further competitive advantages in the market. Simultaneously, related machining suppliers were compelled to introduce higher-performance CNC machine tools in response to technological competition. Downstream industries generated demand for production equipment amid local adjustments. In recent years, the Group has been committed to actively expanding into various segments of the automotive industry and providing cost-effective solutions to customers, which has achieved notable results. During the Year under Review, the Group promptly seized opportunities presented by market recovery, achieving strong sales performance in the automotive components sector.

回顧年度內,全球宏觀經濟環境依然複雜嚴峻, 地緣政治衝突持續升級,國際貿易格局深度調 整,全球產業鏈重構進一步加速。二零二四年, 國內製造業景氣度呈現分化態勢:傳統產業如房 地產及相關上下游行業仍處於深度調整期,固定 資產投資持續收縮; 而新能源汽車、高端裝備、 半導體等戰略性等行業在國家產業政策的支持下 保持增長態勢。總體來看,經過二零二二年下半 年和二零二三年整年的調整,製造業對數控機床 的需求從被壓抑的狀態開始逐漸得到恢復,數控 機床市場進入上升週期。特別是在汽車行業,除 了基本需求回暖,部分汽車頭部廠家為了在市場 競爭中取得進一步的優勢地位,對其供應鏈進行 資源的優化整合。同時,技術競爭迫使相關機械 加工供應商需要導入性能更高的數控機床加以應 對。下游行業在局部調整中產生了對生產設備需 求。本集團近年來致力於在汽車行業的各細分領 域的積極開拓,向客戶提供高性價比的解決方 案,取得了明顯的成效。在回顧年度內,更是不 失時機地抓住市場回暖的機會,在汽車零部件行 業中取得了較好的行銷業績。

CHAIRMAN'S STATEMENT 主席報告

On the other hand, against the backdrop of overall overcapacity in the domestic manufacturing industry, intensified competition across downstream industries has imposed greater pressure on the procurement cost of production equipment. Consequently, competition within domestic CNC machine tools industry has intensified, with price wars becoming the dominant feature of market competition. In recent years, the Group has actively promoted cost reduction and efficiency enhancement across all aspects of the Company's operations through an improvement proposal campaign involving all employees, which has achieved fruitful results. These efforts enabled the Group to proactively lower product prices as and when necessary in response to market competition, maintaining its competitive advantages in the market while significantly improving its profitability and further enhancing its overall operational quality.

另一方面,在國內製造業總體產能過剩的背景下,下游各行業內競爭加劇,對生產設備的採購成本更趨嚴酷。由此,國內數控機床行業競爭愈演愈烈,價格戰已成為市場競爭的最主要特徵。本集團近年來通過全體員工參與的改善提案活動,在公司運營的所有環節大力推進減低成本提高效率,取得了豐碩的成果,使得本集團在市場競爭中能夠審時度勢主動降低產品售價,在市場競爭中取得優勢地位的同時,自身的盈利能力也得到了明顯的提升,整體經營體質得到進一步的提高。

Since March 2024, China's machine tools industry has clearly entered a new upward cycle. During the Year under Review, the demand for machine tools in the manufacturing industry consistently increased, with each quarter recording considerable year-on-year growth as compared to the previous year. This trend has continued into 2025, particularly with robust demand from January to March, resulting in the best order performance since the establishment of the Group. In particular, the demand from the automobile parts and components sector remained robust, while other sectors also experienced year-on-year growth. Following April, the tariff war initiated by the Trump administration resulted in retaliatory escalations in tariffs between China and the United States, along with uncertain prospects for subsequent negotiations between representatives from both countries, casting a shadow over the FY2026 trajectory that was initially promising, and introducing multiple uncertainties.

自二零二四年三月起,國內機床行業已明顯進入 一個新的上行週期,在回顧年度中,製造業對機 床的需求一直處於增長態勢,各季度對比前一年 度均有相當幅度的同比增長。進入二零二五年, 這個趨勢仍然繼續,特別是一至三月份的需求力 五年, 這個趨勢仍然繼續,特別是一至三月份的需求中, 汽車零部件行業需求持續旺盛,其他行業也有關 稅戰,中美雙方的相互報復性關稅升級,以好開局 稅戰,中美雙方的相互報復性關稅升級,好開局 的二零二六財年走勢,被蒙上了一層陰影,增添 了諸多不確定因素。

Despite persistent external uncertainties, the broader context of China's transformation and upgrading in the manufacturing industry, along with demand for equipment upgrades, will continue to unfold. China's manufacturing industry remains the world's largest in scale with the most complete supply chains, and continues to be the most attractive CNC machine tools market globally. In terms of downstream segments, it can be observed that both in the near term and future, the manufacturing demand for miniature precision parts and components driven by the upgrade and transformation of automotive technologies as well as the rapid development of Al and embodied robots, will present an extremely appealing development opportunity for the Group which specializes in miniature precision machine tools.

儘管外部環境仍充滿不確定性,但國內製造業轉型升級與設備更新需求將逐步釋放的大環境依然存在,中國製造業在全球依然規模最大,供應鏈最健全,仍是全球最具魅力的數控機床市場。從下游細分行業來看,可以觀察到近期及未來,由於汽車行業技術的升級轉型,以及AI和人形機器人的急速發展所帶來的小型精密零部件的製造需求,對以小型精密機床為產品特色的本集團提供了極具魅力的發展機遇。

CHAIRMAN'S STATEMENT

主席報告

As a result, we still firmly believe that the long-term demand for high-end CNC machine tools in the transformation and upgrading of the Chinese manufacturing industry and the emergence and development of emerging industries is solid, and there will be no change in general orientation of gradually moving towards high-end products. In addition, as the growth market is becoming saturated, we will adhere to the Group's mediumand long-term objectives, vigorously improve the cost performance of products, continue to expand our product lines, appropriately expand production capacity and strengthen marketing and after-sales service systems.

因此我們仍堅信,中國製造業由於轉型升級以及 新興行業的出現和發展對高端數控機床的長期需 求是堅實的,而且逐步趨向高端化的大方向不會 變。另一方面,在成長市場漸趨存量市場的過程 中,我們會堅持本集團的中長期目標,大力提升 產品的性價比,繼續擴大產品線,適度擴充產 能,強化市場營銷和售後服務體制。

It has been 22 years since the Group entered the market of China in 2003. Through introducing foreign advanced technologies to and realizing mass production in China, the Company has provided a wide range of cost-effective machine tools to its Chinese customers and made its contributions to the development of China's manufacturing industry. The Company has achieved remarkable development and has been recognized by the Chinese manufacturing industry and capital market. Looking ahead, despite the uncertain external environment, the Group is confident in the industry prospects and its own strength. We will continue to focus on Shareholders' interests and to be customer-centric with an aim to further expand our market share, striving to become a world-class comprehensive machine tools manufacturer.

本集團自二零零三年進入中國市場以來,已歷經二十二年,在把國外的先進技術導入到中國的同時,通過在國內實現量產,為中國客戶提供了大量高性價比的機床,為中國的製造業的發展作出了自己的貢獻。在此過程中公司有了長足的發展,也得到了中國製造業和資本市場的認可。展望未來,儘管外部環境充滿變數,但本集團對行業前景及自身實力充滿信心。我們將繼續以股東利益為核心,以客戶需求為導向,進一步提升市場份額,努力成長為世界級的綜合機床廠家。

On behalf of the Board, I would like to express my sincere appreciation to all the staff and the management of the Group for their hard work and contributions in FY2025. At the same time, the Group would like to extend its sincere gratitude to the Shareholders for their attention and trust after the listing of the Company, and to the customers and business partners of the Group for their continuous support and contributions to the Group.

本人謹代表董事會,對本集團全體員工及管理層的辛勤工作,在二零二五財年所做出的貢獻表示很感謝。同時本集團誠摯感謝各位股東在公司上市後對我們的關注和信任,感謝本集團的客戶及業務合作夥伴長期以來對本集團的支持和貢獻。

Looking back at FY2025, the global macroeconomic environment remained complex and challenging, along with escalating geopolitical conflicts. The international trade landscape underwent profound adjustments, and the restructuring of global industrial chains further accelerated. During 2024, the domestic manufacturing industry exhibited a bifurcated trend: traditional sectors such as real estate and related upstream and downstream sectors continued to undergo significant adjustments, with ongoing contraction in fixed asset investments, while strategic sectors such as new energy vehicles, high-end equipment and semiconductors maintained growth momentum with the support of national industrial policies. 業務回顧

回顧二零二五財年,全球宏觀經濟環境依然複雜嚴峻,地緣政治衝突持續升級,國際貿易格局深度調整,全球產業鏈重構進一步加速。二零二四年,國內製造業景氣度呈現分化態勢:傳統產業如房地產及相關上下游行業仍處於深度調整期,固定資產投資持續收縮;而新能源汽車、高端整期、等體等戰略性等行業在國家產業政策的支持下保持增長態勢。總體來看,經過二零二二年整年的調整,製造業對整控機床的需求從被壓抑的狀態開始逐漸得到恢復,數控機床市場進入上升週期。

特別是在汽車行業,除了基本需求回暖,部分汽車頭部廠家為了在市場競爭中取得進一步的優勢地位,對其供應鏈進行資源的優化整合。同時,技術競爭迫使相關機械加工供應商需要導入性能更高的數控機床加以應對。下游行業在局部調整中產生了對生產設備需求。本集團近年來致力於在汽車行業的各細分領域的積極開拓,向客戶提供高性價比的解決方案,取得了明顯的成效。在四顧年度內,更是不失時機地抓住市場回暖的機會,在汽車零部件行業中取得了較好的行銷業績。

另一方面,在國內製造業總體產能過剩的背景下,下游各行業內競爭加劇,對生產設備的採購成本更趨嚴酷。由此,國內數控機床行業競爭愈減愈烈,價格戰已成為市場競爭的最主要特徵。本集團近年來通過全體員工參與的改善提案活動,在公司運營的所有環節大力推進減低成本提高效率,取得了豐碩的成果,使得本集團在市場競爭中能夠審時度勢主動降低產品售價,在市場競爭中取得優勢地位的同時,自身的盈利能力也得到了明顯的提升,整體經營體質得到進一步的提高。

管理層討論及分析

During the Year under Review, the Group saw a steady increase in orders secured from major downstream industries such as the automobile parts and components sector, with sales revenue and net profit increasing by 36.6% and 63.0% respectively as compared with the last financial year to approximately RMB4,261,557,000 and RMB782,417,000, respectively. Benefitting from the Group's various cost reduction and efficiency improvement efforts, the profitability improved significantly, with the gross profit margin increasing by approximately 4.4 percentage points to 33.1% from 28.7% in the last financial year. Net profit margin increased by approximately 3.0% to 18.4% from 15.4% in the last financial year.

於回顧年度內,本集團在汽車零部件等主要下游行業獲取的訂單穩步增加,銷售收入和淨利潤較上一財年分別同比增長36.6%及63.0%,至約人民幣4,261,557千元及人民幣782,417千元。得益於本集團推行的各項降本增效工作,盈利水平明顯提升,毛利率較上一財年的28.7%增加約4.4個百分點,至33.1%。淨利潤率由上一財年的15.4%增加約3.0個百分點至18.4%。

Basic earnings per share during the Year under Review were approximately RMB2.08 (last financial year: approximately RMB1.26).

FINANCIAL REVIEW

Revenue

During the Year under Review, the total revenue increased by approximately 36.6%, or approximately RMB1,141,883,000, from approximately RMB3,119,674,000 in the last financial year to approximately RMB4,261,557,000. Such increase was primarily due to (1) increased demand for machine tools from the downstream manufacturing industry as a result of China's pickup in overall economic conditions in 2024 and the upturn in the CNC machine tools industry commencing in March and April 2024; and (2) improved product cost-effectiveness and competitiveness due to the Company's ongoing cost reduction and efficiency improvement initiatives, as well as active participation in market competition to reduce sales price. More orders were secured by the Company, contributed by its continuously diversified product offerings and increased penetration into downstream segments. In particular, (i) the precision lathes recorded sales of approximately RMB3,624,492,000 during the Year under Review, representing a year-on-year increase of approximately 36.5%; (ii) the precision machining centres recorded sales of approximately RMB243,618,000 during the Year under Review, representing a year-on-year increase of approximately 57.3%; (iii) the precision grinding machines recorded sales of approximately RMB208,359,000 during the Year under Review, representing a year-on-year increase of approximately 44.4%; and (iv) other sales, which mainly included sales of thread and form rolling machines, and ancillary parts and components, recorded approximately RMB185,088,000, representing a year-on-year increase of approximately 11.8%.

The gross profit during the Year under Review increased by approximately 57.5% to approximately RMB1,410,433,000 as compared to the last financial year. The gross profit margin increased from approximately 28.7% in the last financial year to approximately 33.1% during the Year under Review. The increased sales revenue during the Year under Review led to a corresponding increase in gross profit, with the gross profit margin rising by 4.4 percentage points, which was mainly attributable to the substantial enhancements in cost reduction and efficiency improvement implemented by the Company.

Other Income and Gains

Other income and gains of the Group primarily consist of bank interest income, government grants and others. During the Year under Review, other income and gains decreased by approximately 5.7% as compared with the last financial year to approximately RMB80,384,000, primarily due to the slight decrease in the bank interest income received as a result of the slight decrease in the cash and bank balances held by the Company during the Year under Review. The bank interest income decreased by approximately RMB5,146,000 year-on-year.

Selling and Distribution Expenses

Selling and distribution expenses primarily consist of staff salaries and benefits, transportation and insurance costs, warranty expenses, travel expenses, office utility expenses, marketing and advertisement expenses and depreciation costs. Such increase in expenses was mainly attributable to the increase in salaries and benefits costs for marketing and after-sales service staff, and the increase in warranty expenses as a result of the increase in shipment volume.

其他收入及收益

本集團的其他收入及收益主要包括銀行利息收入、政府補助及其他。於回顧年度,其他收入及收益約人民幣80,384千元,較上一財年減少約5.7%。主要由於回顧年度內,公司持有的現金及銀行結餘略有減少,使得收取的銀行利息收入小幅下降。銀行利息收入同比減少約人民幣5,146千元。

銷售及分銷開支

銷售及分銷開支主要包括員工薪金及福利、運輸及保險成本、保修開支、差旅費開支、辦公室水電費開支、市場推廣及廣告開支及折舊成本。於回顧年度,本集團的銷售及分銷開支約為人民幣189,947千元,較上一財年增加約21.9%,佔本集團於回顧年度的收入約4.5%。開支增加主要由於回顧年度內營銷及售後服務人員薪金及福利成本的增加,及隨著出貨量的增加帶來保修開支的增加。

Administrative Expenses

Administrative expenses primarily consist of salaries and benefits for management, administrative and financial personnel, administrative costs, customisation and development expenses, depreciation expenses relating to property, plant and equipment used for administrative purposes, amortisation expenses for the management information systems, and other taxes and levies expenditure.

During the Year under Review, administrative expenses amounted to approximately RMB152,629,000, representing an increase of approximately 34.1% as compared with the last financial year, which was mainly due to the increase in development expenses and salaries and benefits costs for administrative staff, and the increase in office expenses of the administrative department during the Year under Review.

Other Expenses

Other expenses primarily include exchange losses, losses on the disposal of fixed assets, banking charges and others. During the Year under Review, other expenses amounted to approximately RMB4,434,000, representing a decrease of approximately RMB5,279,000 as compared with the last financial year, mainly due to the combined effect of the decrease in exchange losses arising from the Japanese Yen deposits and receivables held by the Company as a result of movements in the Japanese Yen against Renminbi exchange rates, and the decrease in the losses on disposal of fixed assets during the Year under Review.

Impairment Losses on Financial Assets

During the Year under Review, the provision for net impairment losses on financial assets amounted to approximately RMB6,216,000, as compared to the provision for net impairment gains of RMB2,340,000 in the last financial year, which was mainly due to the increase in sales during the Year under Review and the corresponding increase in balance of trade and notes receivables as at the end of the year, resulting in an increase in the provision made for the same.

Finance Costs

During the Year under Review, the finance costs were approximately RMB412,000 (for the last financial year: RMB993,000), which was mainly due to the decrease in interest arising from the discounting of bank bills during the Year under Review as compared with that of the same period last year.

管理費用

管理費用主要包括管理層、行政及財務人員薪金及福利、行政辦公費成本、訂製及開發開支、用作行政用途的物業、廠房及設備有關的折舊開支、管理信息系統攤銷開支、其他稅項及徵費開支。

於回顧年度內,管理費用約為人民幣152,629千元,較上一財年增加約34.1%,主要由於回顧年度內開發開支及行政人員的薪金及福利成本的增加,及行政管理部門的辦公費用的增加所致。

其他支出主要包括匯兑虧損、出售固定資產的虧損、銀行手續費及其他。於回顧年度,其他支出約為人民幣4,434千元,較上一財年減少約人民幣5,279千元,主要由於回顧年度內日圓對人民幣的匯率波動,公司持有的日圓存款及應收款產生的匯兑損失減少及固定資產處置損失減少的綜合影響所致。

金融資產減值損失

於回顧年度內,計提的金融資產減值為淨損失 約人民幣6,216千元(上一財年為淨收益人民幣 2,340千元),主要是由於回顧年度銷售額的增加,應收貿易款項及票據年度末餘額相應增加, 由此計提的準備金增加所致。

財務成本

於回顧年度內,融資成本約為人民幣412千元 (上一財年:人民幣993千元)主要由於回顧年度 內銀行匯票貼現所產生的利息比去年同期減少所 致。

管理層討論及分析

Average inventory turnover days

During the Year under Review, the Group's average inventory turnover days were 114 days, representing a decrease of 43 days as compared to the last financial year, which was mainly due to the increase of approximately 36.6% in sales for the Year under Review as compared with the last financial year. The increase in sales led to an increase in production volume, which accelerated the turnover of the Company's inventory, resulting in a decrease in the average inventory turnover days.

Average turnover days of trade and notes receivables

During the Year under Review, the Group's average turnover days of trade and notes receivables were 109 days, representing an increase of 4 days as compared to the last financial year, which was mainly due to the increase of approximately 36.6% in sales for the Year under Review as compared with the last financial year. However, the average balance of trade and notes receivables increased by 41.6% as compared to the last financial year. The increase in trade and notes receivables exceeded the increase in sales, resulting in an increase in average turnover days as compared to the last financial year. Currently, the relevant trade receivables are all within normal credit terms.

Average turnover days of trade and notes payables

During the Year under Review, the Group's average turnover days of trade and notes payables were 73 days, representing a decrease of 22 days as compared to the last financial year, which was mainly due to the fact that the average balance of trade and notes payables during the Year under Review remained basically flat with those of the last financial year, while the cost of sales during the Year under Review increased by 28.2% as compared to the last financial year, resulting in a faster average turnover of trade and notes payables.

平均存貨週轉天數

於回顧年度,本集團的平均存貨週轉天數為114 天,較上一財年減少43天。主要是由於回顧年 度的銷售額較上一財年增加約36.6%,銷售額的 增加帶來產量的增加,加快了公司存貨的週轉, 反映出來的結果是平均存貨週轉天數減少。

應收貿易款項及票據的平均週轉天數

於回顧年度,本集團的應收貿易款項及票據的平均週轉天數為109天,較上一財年增加了4天。主要是由於回顧年度的銷售額較上一財年增加約36.6%,但應收貿易款項及票據的平均結餘比上一財年增加41.6%,應收貿易款項及票據的增加幅度大於銷售額的增加幅度,平均週轉天數比上一財年有所上升。目前有關應收貿易款項均處在正常信貸期內。

應付貿易款項及票據的平均週轉天數

於回顧年度,本集團的應付貿易款項及票據的平均週轉天數為73天,與上一財年相比減少了22天,主要是由於回顧年度的應付貿易款項及票據的平均結餘額與上一財年基本持平,但是回顧年度的銷售成本較上一財年增加28.2%,應付貿易款項及票據的平均週轉加快所致。

流動比率

於二零二五年三月三十一日,本集團的流動比率約為3.7倍,二零二四年三月三十一日同比率約為3.7倍,保持穩定。於回顧年度內,本集團錄得公司銷售增加,導致應收貿易款項及票據增加,同時因公司產量的增加,資材採購相應增加,截至二零二五年三月三十一日的應付貿易款項餘額增加14.4%,整體流動負債增加20.8%,同時截至二零二五年三月三十一日的流動資產同比增加21.3%所致。

OUTLOOK

Since March 2024, China's machine tools industry has clearly entered a new upward cycle. During the Year under Review, the demand for machine tools in the manufacturing industry consistently increased, with each quarter recording considerable year-on-year growth as compared to the previous year. This trend has continued into 2025, particularly with robust demand from January to March, resulting in the best order performance since the establishment of the Group. In particular, the demand from the automobile parts and components sector remained robust, while other sectors also experienced year-on-year growth.

Following April, the tariff war initiated by the Trump administration resulted in retaliatory escalations in tariffs between China and the United States, along with uncertain prospects for subsequent negotiations between representatives from both countries, casting a shadow over the FY2026 trajectory that was initially promising and introducing multiple uncertainties.

Despite persistent external uncertainties, the broader context of China's transformation and upgrading in the manufacturing industry, along with demand for equipment upgrades, will continue to unfold. China's manufacturing industry remains the world's largest in scale with the most complete supply chains and continues to be the most attractive CNC machine tools market globally. Following the outbreak of tariff war, the Chinese government promptly introduced relevant fiscal and financial policies. Based on orders in April and May, the impact of the tariff war has been limited.

Accordingly, the Group maintains its anticipation of a more robust industry demand in FY2026 compared to the Year under Review, and will work to seize this opportunity to achieve its best performance since the establishment of the Group.

In terms of downstream segments, it can be observed that both in the near term and future, the manufacturing demand for miniature precision parts and components driven by the upgrade and transformation of automotive technologies as well as the rapid development of Al and embodied robots, will present an extremely appealing development opportunity for the Group which specializes in miniature precision machine tools.

展望

自2024年3月起,國內機床行業已明顯進入一個新的上行週期,在回顧年度中,製造業對機床的需求一直處於增長態勢,各季度對比前一年度均有相當幅度的同比增長。進入2025年,這個趨勢仍然繼續,特別是1~3月份的需求強勁,為本集團成立以來的最佳訂單業績。其中,汽車零部件行業需求持續旺盛,其他行業也有同比增長。

4月份之後,由於特朗普政權發動了關稅戰,中 美雙方的相互報復性關稅升級,以及後期的兩國 代表的商談前景不明,使原本良好開局的2026 財年走勢,被蒙上了一層陰影,增添了諸多不確 定因素。

儘管外部環境仍充滿不確定性,但國內製造業轉型升級與設備更新需求將逐步釋放的大環境依然存在,中國製造業在全球依然規模最大,供應鏈最健全,仍是全球最具魅力的數控機床市場。在進入關稅戰之後,中國政府及時出台了相關的財政和金融政策。從4、5月份訂單情況來看,關稅戰的影響規模是限定的。

因此,本集團仍堅持2026財年的行業需求會好 於回顧年度的預估,並努力抓住這個機會挑戰集 團成立以來的最佳業績。

從下游細分行業來看,可以觀察到近期及未來,由於汽車行業技術的升級轉型,以及AI和人形機器人的急速發展所帶來的小型精密零部件的製造需求,對以小型精密機床為產品特色的本集團提供了極具魅力的發展機遇。

管理層討論及分析

With the fifth plant in Pinghu put into operation in October 2024, the Group expects to increase its annual production capacity by 3,000 to 4,000 units of machine tools. Precision Tsugami Anhui also continues to adopt new equipment, constantly improving its machining capacity for parts and components and its assembling capacity for function units. In addition, the Group has formulated plans to strategically position its production capacity in 2025. In May 2025, the Group acquired a land of approximately 34 mu in Pinghu Economic Development District, and planned to construct two plants over the next two years. The new plant area under planning is expected to increase the annual production capacity by approximately 3,000 units of machine tools. The Group is confident in its future development and aims to further expand its market share by providing cost-effective products and services to the market to meet customer demands, striving to become a world-class comprehensive machine tools manufacturer.

隨著平湖第五工廠於2024年10月投產,本集團預計年度增加3,000至4,000台機床產能。安徽津上也在不斷導入新設備,零部件加工產能及功能單元組裝產能在不斷提升。2025年本集團也有提前佈局未來公司的產能的計劃,5月已在平湖經濟開發區新購入約34畝土地,計劃花兩年時間建設兩棟廠房,規劃的新廠區將來預計每年可增加約3,000台的機床產能。本集團對未來的發展充滿信心,我們將通過向市場提供高性價比的產品和服務,滿足客戶需求,進一步提升市場份額,努力成長為世界級的綜合機床廠家。

就本年度授予的獎勵而言,薪酬委員會認為,本 計劃旨在獎勵對本集團的業務發展作出貢獻的合 資格參與者,並鼓勵合資格參與者為本公司及股 東的整體利益而努力提升本公司的價值。此外, 薪酬委員會亦認為:

- the grantees in relation to the grant of awarded shares on 7 March 2025 (the "Grantees") are eligible participants under the scheme who have contributed directly to the overall business performance and sustainable development of the Group;
- (i) 二零二五年三月七日授予獎勵股份涉及 的承授人(「**承授人**」)是為本集團的整體 業務表現及可持續發展作出直接貢獻的 本計劃下合資格參與者:
- (ii) the grant of awarded shares to the Grantees is a recognition for their past contributions to the Group; and
- (ii) 向承授人授予獎勵股份乃為認可彼等過 去對本集團的貢獻;及
- (iii) the awarded shares are subject to the terms of the scheme, which provides for circumstances under which the awarded shares may lapse.

Therefore, the Remuneration Committee is of the view that the grant of awarded shares without any performance target and clawback mechanism aligns with the purpose of the scheme.

ABOUT THE ESG REPORT

The purpose of this ESG Report (the "Report") is to enable stakeholders to fully understand the Group's corporate mission and its social responsibilities, and to demonstrate the Group's ESG performance in areas such as corporate governance, environmental protection, employment practices, operational practices and community investment.

ESG Governance Structure

The Group has established an ESG governance structure to integrate ESG governance into its business operations and decision-making processes. The board (the "Board") of directors (the "Directors") and its audit committee (the "Audit Committee") assume overall responsibility for ESG matters related to the Group, and their members possess the appropriate skills, experience, knowledge, and perspectives necessary to oversee the Group's ESG matters. The Board must hold at least one meeting each year to establish and plan the overall ESG approach, ensuring it aligns with the Group's business strategy. The Audit Committee must develop and review ESG-related management approach, strategies, principles, policies, targets, and priorities of issues. To better monitor the Group's performance, issues, and potential risks in ESG-related areas, the Audit Committee must regularly assess and identify the Group's ESG risks and opportunities, as well as evaluate and review the ESG-related targets set and the effectiveness of policies. The Audit Committee also needs to review the disclosure information in this Report and recommend it to the Board for approval, while proposing specific actions or decisions for the Board to consider in order to maintain the integrity of this Report.

To enhance the effectiveness of the Group's ESG governance, the Group has established an ESG Working Group (the "Working Group") to assist the Audit Committee in overseeing ESG-related matters. The Working Group is composed of core members from different departments who possess relevant qualifications and professional knowledge in all aspects of ESG and is responsible for the specific implementation of ESG management. The Working Group collaborates with an independent third party to collect and analyse ESG data, monitor and evaluate the Group's ESG-related performance, track and review the progress of ESG-related targets, ensure compliance with relevant laws and regulations, assist in conducting materiality assessments, and prepare this Report. The Working Group must also hold at least one meeting each year to discuss the Group's performance in ESG-related areas and develop appropriate solutions to improve the overall performance of ESG policies. Emission Control

Exhaust Gas Emissions

With respect to emission management, the Group has established regular inspection and real-time monitoring mechanisms. Each year, the Group engages a professional third-party testing agency to conduct comprehensive emission testing, focusing on pollutant concentrations at emission outlets, including particulates, total non-methane hydrocarbons, acetate esters, and benzene series compounds. Following testing, the results are meticulously compared and evaluated against the Ambient Air Quality Standards in the PRC to ensure that emissions meet regulatory requirements. Meanwhile, the Group integrates emissions data into the monitoring platform of the Ministry of Ecology and Environment of the PRC, enabling 24-hour uninterrupted real-time supervision. Should any abnormal emission data be detected, the Group will immediately implement corrective measures to ensure ongoing compliance with national standards.

All machinery used in the Group's production facilities is powered by electricity, offering clean and efficient operation with minimal negative environmental impact. During the Reporting Period, the Group's emissions primarily originated from the use of petrol and diesel by vehicles. To effectively limit emissions generated by transportation activities and minimise environmental impact, the Group has developed and implemented a series of emission reduction measures, including but not limited to:

- Encourage employees to commute by public transportation and to use environmentally friendly vehicles instead of high-emission vehicles;
- Encourage employees to carpool whenever possible during business trips, and to optimise routes and itineraries to reduce vehicle usage and energy consumption;
- Utilise electronic means of communication such as video conferencing to reduce the number of trips;
- Purchase standard vehicle fuel and conduct regular inspections and maintenance of vehicles and other mobile machinery to ensure compliance with relevant emission standards and to prevent inefficient energy consumption;

排放控制

廢氣排放

- 鼓勵員工使用公共交通通 勤及使用更環保的車輛而 非高污染車輛;
- 鼓勵員工出差時盡量車輛 共乘,優化路線和行程, 以減少車輛使用量及能源 消耗;
- 利用視頻會議等電子通訊 手段減少出差次數;
- 購買標準車輛燃油,並定期檢查和保養車輛及其他移動機器,以確保符合相關的排放標準及避免低效能源消耗;

環境、社會及管治報告

- Require operators and drivers to turn off machines and vehicles when in standby mode:
- Increase the use of hybrid vehicles;
- Encourage employees to use shared bicycles within the factory premises;
- Gradually replace diesel forklifts with electric forklifts; and
- Actively implement the emission reduction measures outlined in the "GHG emissions" section in this aspect.

During the Reporting Period, with the significant expansion of the business scale, the overall exhaust gas emissions of the Group increased compared to FY2024. Notably, the growth rate of exhaust gas emissions is lower than the growth rate of production volume during the same period. The specific performance is as follows:

Type of exhaust gas¹ 廢氣種類¹	Unit 單位	FY2025 二零二五財年	FY2 二零二四
Nitrogen oxides (NO _x)	kg	254.51	22
氮氧化物(NO _x)	千克		
Sulphur oxides (SO _x)	kg	1.60	
硫氧化物(SO _x)	千克		
Particulate matter (PM)	kg	23.38	20
顆粒物(PM)	千克		

The calculation method of exhaust gas emissions is based on How to prepare an ESG Report - Appendix 2: Reporting Guidance on Environmental KPIs issued by HKEX.

GHG Fmissions

The Group's GHG emissions primarily originate from three sources: petrol and diesel consumed by vehicles (Scope 1), purchased electricity (Scope 2), and business travel activities (Scope 3).

- 增加油電混合混動車輛的 使用;
- 鼓勵員工在廠區內使用共 享自行車;
- 逐步使用電動叉車代替柴 油叉車;及
- 積極採取於本層面「溫室氣 體排放 | 一節中所説明的減 排措施。

於本報告期間,伴隨業務規模的 顯著擴張,本集團整體廢氣排放 量較二零二四財年有所上升。值 得關注的是,廢氣排放量增幅低 於同期生產量的增長幅度,具體 表現如下:

Unit 單位	FY2025 二零二五財年	FY2024 二零二四財年
kg 千克	254.51	225.14
kg 千克	1.60	1.48

環境、社會及管治報告

To proactively reduce GHG emissions, the Group has vigorously implemented electricity and energy-saving initiatives. In office areas, the usage duration and methods of electrical equipment are strictly regulated. In the production process, the Group optimises the process flow of machining equipment to shorten processing times, thereby effectively reducing power consumption. For detailed explanations of these specific measures, please refer to the "Exhaust Gas Emissions" in this aspect and "Energy Consumption" in aspect A2.

In addition, the Group actively promotes the use of electronic communication methods, such as telephone and video conferences, to replace long-distance, in-person meetings, thereby significantly reducing carbon emissions associated with business travel. At the same time, the Group places strong emphasis on advocating and disseminating its environmental philosophy. On one hand, green information notices and environmental protection posters are displayed in office areas to foster a strong atmosphere of environmental protection. On the other hand, the Group regularly organises tree planting and greening activities to convey environmental messages to employees through practical actions, enhance their environmental awareness, and actively promote effective environmental management practices.

Sewage Discharge

The Group's wastewater discharge is primarily categorised into domestic wastewater and factory production water. In the area of factory water management, the Group consistently upholds the concept of sustainable development, actively implements water resource recycling strategies, and is committed to achieving both efficient water resource utilisation and environmental protection.

To ensure stable circulating water quality and meet production requirements, the Group employs a water quality monitoring system to conduct real-time, precise monitoring of key indicators such as circulating water concentration. By determining whether the circulating water meets the criteria for continued use, the Company ensures a stable and reliable water supply for production. Typically, the circulating water is fully replaced every six months to maintain optimal water quality and ensure that the production process is not affected by fluctuations in water quality.

To minimise the loss of water resources during the circulation process, the Group is equipped with specialised protective equipment, effectively reducing water evaporation. When circulating water ultimately reaches the disposal standard, the Group strictly adheres to environmental protection regulations and treatment procedures, integrating it with domestic wastewater into a unified sewage treatment system. This mixture is then conveyed through the municipal sewage pipeline network to local sewage treatment plants for advanced processing. As a result, the Group's total water consumption is equivalent to its wastewater discharge volume. The data on the Group's total water consumption will be explained in the section headed "Water Consumption" under aspect A2.

污水排放

本集團排放的污水主要分為生活 污水與工廠生產用水兩大類。在 工廠用水管理領域,本集團始終 秉持可持續發展理念,積極推行 水資源循環利用策略,致力於實 現水資源的高效利用與環境保護 的雙贏。

Waste Management

The Group consistently upholds waste management principles, ensuring the proper handling and responsible disposal of all waste generated from business activities. Accordingly, the Group has established clear and specific waste management guidelines to ensure precise identification and classification of waste, centralised storage, and unified disposal. In addition, designated personnel are responsible for promptly managing waste and maintaining environmental hygiene around collection bins. All waste management initiatives of the Group strictly comply with relevant environmental laws and regulations.

Hazardous Waste

The Group has established the Hazardous Waste Management Regulations. In accordance with these regulations, all hazardous waste is collected and processed by authorized agents with the necessary qualifications. The quantity of disposed waste is meticulously recorded and carefully cross-checked with contractor reports to ensure the process is thorough and appropriate. The Group requires all departments to collect and store waste in accordance with the regulations, and to transport hazardous waste to designated warehouses within the specified timeframe. Employees are strictly prohibited from storing hazardous waste outside of these warehouses. Only designated hazardous waste managers are authorised to handle storage operations; other employees are not permitted to enter the storage area without authorisation. Managers must regularly inspect storage containers to prevent leaks. In the event of a leak, prompt measures must be taken to replace the storage container. Furthermore, all containers must be clearly labelled with the name and identification of the waste. Reactive hazardous liquids must be stored separately in designated containers. Hazardous waste generated by each department must be registered prior to being sent to storage facilities, and records must be properly maintained.

廢棄物管理

有害廢棄物

本集團制定了《危廢管理規定》。 依據規定,所有有害廢棄物均由 具備處理資質的授權代理負責 收集與處理。處置的廢棄物數量 會詳細記錄, 並與承包商報告仔 細核對,確保處理過程全面且恰 當。本集團要求各部門依照規定 收集、儲存廢棄物, 並在規定時 間內將有害廢棄物運送至專門倉 庫。員工嚴禁在倉庫以外區域存 放有害廢棄物。僅被指定的有害 廢棄物管理員有權負責儲存工 作,其他員工未經許可不得進入 儲存區域。管理員需定期檢查儲 存罐,防止出現洩漏情況。一旦 發現洩漏,必須及時採取措施更 換儲存罐。此外,所有容器都要 張貼標明廢棄物名稱及標識的標 籤,具有反應性的有害液體需單 獨存放在特定容器中。各部門產 生的有害廢棄物在送往儲存設施 時均需進行登記,並妥善保存記 緑。

環境、社會及管治報告

To further reduce environmental impact, the Group has developed an energy-saving and waste minimisation solution for waste liquid treatment. This solution enables water-soluble waste liquid to first undergo oil and residue removal, followed by low-temperature evaporation to convert it into cooling water (recycled water). The recycled water is then further purified to meet the standards required for washing or process water within the factory. Following the implementation of this solution, hazardous waste output has been reduced, achieving significant waste liquid minimisation while also lowering hazardous waste treatment costs. Furthermore, the Group has replaced disposable batteries used in equipment with rechargeable batteries, effectively reducing the generation of waste batteries.

During the Reporting Period, although the total volume of hazardous wastes emissions increased significantly due to business expansion, the emission intensity remained almost unchanged compared to the FY2024. An overview of hazardous wastes generated by the Group is as follows:

In FY2025, the Environmental Protection Agency adjusted the classification criteria for waste oil. Due to the higher water content in waste oil at that time, it gradually reclassified the waste oil as emulsion. This change in classification criteria altered the statistical categories, leading to a significant increase in the statistical data on emulsion production and a decrease in waste mineral oil.

^{4 2025}財年,環保局調整了廢油的 分類判定標準,由於此時廢油含 水量較高,便逐步將其歸類為乳化 液。這一分類標準的變更,使統計 類別發生改變,進而導致乳化液產 生量的統計數據大幅增加,廢礦物 油減少。

環境、社會及管治報告

Non-hazardous Waste

The Group has established the *PTC Regulations on the Disposal of Recyclables*, which clearly define the procedures for managing non-hazardous waste. During the Reporting Period, non-hazardous waste generated from the Group's business operations primarily consisted of general waste, paper, plastic, food waste, and waste ash. All discarded paper was recycled.

To minimise the environmental impact of non-hazardous waste generated by business operations, the Group has implemented a range of measures for handling non-hazardous waste and introduced a series of waste reduction initiatives. These measures include, but are not limited to:

- Organise and maintain the waste classification system and recycling containers, collecting wastepaper, metals, food waste, and more;
- Display posters and clearly label the types of waste or recyclable materials on the waste bins;
- Sort recyclable waste into the appropriate containers;
- Educate employees on methods of waste classification; and
- Assign administrative personnel to manage the transportation of waste and recyclables for the collection of garbage and recyclable materials.

Furthermore, the Group offers recommendations to employees regarding cafeteria waste issues to raise awareness of waste reduction. Surveillance cameras have been installed in the cafeteria to monitor and reduce the daily amount of food available for composting. If employees are found to be wasting food, they will receive a verbal warning for the first offense; repeated violations will result in disciplinary action. The Group seeks to cultivate environmental awareness among employees and to share responsibility for the disposal of non-hazardous waste.

Regarding office paper usage, the Group has implemented a range of environmental protection measures in line with the principle of minimising the negative impact of business operations on the environment. To ensure the efficient use of paper and provide convenience to both employees and customers, the Group offers customers the option of paperless billing and requires employees to give priority to using recycled paper for printing. Furthermore, the Group encourages employees to minimise paper consumption and actively promotes electronic communication methods for directories, forms, reports, and data storage. All used paper, cartons, and envelopes, including non-confidential documents, are recycled by the Group. In factories with complex production processes, the Group equips each machine with a tablet, enabling inspection checklists to be managed in a paperless format. Information such as working hours and process details can be displayed on the tablet, which not only enhances operational efficiency but also further reduces paper consumption, in line with the Group's environmental philosophy.

During the Reporting Period, although the total volume of non-hazardous waste emissions has substantially increased due to business expansion, the emission intensity only witnessed an 8% rise compared to the FY2024. The following provides an overview of the non-hazardous waste generated by the Group:

A2. Use of Resources

The Group is committed to actively promoting the efficient use of resources, promptly monitoring the potential environmental impacts of its business operations and vigorously advancing green office and operational practices to minimise the environmental impact of its activities. The Group's employees embrace a strong environmental philosophy and voluntarily conserve resources, such as electricity, petrol, diesel, and water. Furthermore, the Group has established relevant policies and systems to manage resource utilisation throughout its operations more efficiently.

Energy Consumption

The Group actively practices the principles of energy conservation and emission reduction and has established clear *Administration of Energy and Resources* to control and reduce unnecessary energy consumption, ensuring the efficient utilisation of resources.

Conserving the Use of Metal Castings

In our pursuit of both manufacturing excellence and our environmental philosophy, the Group actively implements a series of innovative strategies to optimise the efficiency of metal casting utilisation. We make extensive use of advanced precision analysis software to conduct multi-dimensional professional analysis of the core components of our machine tools, striving for an optimal design balance among key factors such as weight, strength, rigidity, and heat transfer performance. This initiative has not only achieved a substantial reduction in consumable usage, but has also enhanced the overall rigidity of the machine tool while streamlining the manufacturing process, resulting in dual optimisation of manufacturing convenience and performance.

A2. 資源使用

能源消耗

本集團積極踐行節能減排理念,並已制定明確的《能源資源管理規定》,以控制並減少非必要的能源消耗,確保資源得以有效運用。

節約金屬鑄件使用

環境、社會及管治報告

Compared with the traditional design mode, the current standard design approach for high-precision machine tools adopted by the Group has demonstrated remarkable effectiveness. This design approach not only effectively reduces the consumption of casting materials but also drives a significant increase in production output. During the Reporting Period, production output has increased significantly, while the consumption of casting materials per unit of product has dropped notably. This strongly demonstrates the dual outstanding effectiveness of the new design approach in enhancing production efficiency and controlling costs. This measure not only effectively alleviates resource pressures, but also significantly reduces energy consumption during both the casting and subsequent processing stages, aligning with the global trend towards green manufacturing. In the actual production process at the factory, the Group has further implemented intelligent upgrading strategies. By comprehensively deploying robotic arm automation systems, we have replaced manual assembly with high-precision mechanical operations, thereby reducing errors caused by human factors at the source. This ensures that every process strictly adheres to design standards and enhances the consistency of finished product quality. Meanwhile, in material processing, we have thoroughly optimised key procedures such as blanking and bending by adopting advanced CNC blanking technology and precision bending moulds, which minimises scrap generation and maximises material utilization. This series of technological innovations has significantly enhanced material utilisation for the Group while safeguarding product performance, thereby providing robust technical support for sustainable development objectives.

Power Saving

The Group incorporates innovative energy-saving features across all equipment models to uphold its commitment to sustainable development. This feature enables production machines to automatically stop the oil cooler, chip conveyor, oil pump, and other electric motors three minutes after entering standby mode upon completion of processing. Additionally, if the machine operates automatically without human intervention for 10 minutes, the internal lighting and NC screen display will be automatically turned off to further enhance energy-saving capabilities.

相較於傳統設計模式,本集團現 行的高精密機床標準設計方式展 現出卓越成效。該設計方式在有 效降低鑄材消耗量的基礎上,促 使產量實現了顯著增長。於本報 告期間,產量大幅增加,而每單 位產品的鑄材消耗量則顯著下 降。這有力地彰顯了新設計方式 在提高生產效率與控制成本兩個 維度上的雙重卓越成效。此舉不 僅有效緩解了資源壓力,更在鑄 材澆注及後續加工環節顯著降低 了能源消耗,契合綠色製造的全 球趨勢。在工廠實際生產環節, 本集團更進一步引入智能化升級 策略。通過全面部署機械臂自動 化作業系統,我們以高精度機械 操作取代人工裝配,從源頭上減 少了因人為因素導致的誤差,確 保每一道工序都嚴格遵循設計標 準,提升了成品品質的一致性。 同時,在材料加工方面,我們對 下料、摺彎等關鍵工藝進行深度 優化,採用先進的數控下料技術 與精密摺彎模具,最大限度減少 邊角料產生,提升材料利用率。 此系列技術革新,使本集團在保 障產品性能的前提下,材料利用 率獲得顯著提升,為可持續發展 目標提供了強有力的技術支撐。

節約電能

本集團在全機型設備上使用創新 節電功能,以貫徹本集團可持產 發展的理念。該功能能使生產 器於加工結束進入待機狀態3分和 後,油冷機、排屑機、一多 他各電機自動運行過程中無人操作10 分鐘後,亦將會自動關閉機內照 明和NC畫面顯示,以進一步加強 節電功能。

During the Reporting Period, in addition to organising the skills competition, the Group also held two improvement proposal recognition conferences – one in each half of the year – collecting tens of thousands of employee proposals. Outstanding proposals were honoured with the Diamond Award, Gold Award, Silver Award, Bronze Award, and the Most Improvement Proposals Award. These proposals have played a significant role in enhancing machining efficiency, optimising machine quality, and improving management systems. The successful organisation of the proposal conference has established an important platform for employees to contribute suggestions and insights. Employees actively participate, offering their wisdom and strength to the development of the Group.

<u>Case – Efficiency Enhancement and Cost Reduction</u> <u>Improvement Proposal</u>

Starting from January 2025, based on the successful implementation of outstanding improvement proposals, the S205A model has undergone a technological upgrade. The original processing method, which employed a pin-type brake positioning shaft in conjunction with a power head for milling, faced issues such as limited excitation torque. This innovation has groundbreakingly introduced advanced positioning technology, leading to an increase in the model's excitation torque while effectively enhancing the equipment's operational stability and adaptability to complex working conditions. Additionally, the new process has streamlined the cumbersome assembly procedures and supporting components previously required for the pin-type structure. By optimizing the transmission chain design, it has successfully achieved a significant reduction in the production cost of a single unit of equipment. This technological iteration not only substantially improves the core performance of the product but also achieves a dual breakthrough in both process optimization, cost reduction, and efficiency enhancement.

In the production of mandrel-pressed tubes, the original process involved using bar stock which was machined into hollow tube materials through deep-hole drilling, followed by subsequent processing steps. However, the deep-hole drilling process was complex, with issues such as a long processing cycle and significant material waste. After switching to precision tube materials provided by a new supplier, these tubes met high standards in terms of dimensional accuracy and surface quality, directly satisfying the requirements for subsequent processing and eliminating the need for the time-consuming and labour-intensive deep-hole drilling process. Through actual calculations, it was found that after adopting the new solution, the average processing time per tube was reduced by several minutes, significantly improving production efficiency.

B4. Labour Standards

The Group has consistently adhered to lawful and compliant employment principles, strictly prohibiting the employment of any child labour or forced labour and fully complying with all laws and regulations related to the prevention of child labour and forced labour. Specifically, this includes the following legal provisions:

- Labour Law of the People's Republic of China
- Provisions on Prohibition of Child Labour of the People's Republic of China
- Law of the People's Republic of China on Protection of Minors

During the Reporting Period, the Group did not experience any violations or illegal incidents involving child labour or forced labour.

Prevention of Child Labour and Forced Labour

During the recruitment process, the Group requires new employees to provide genuine and accurate personal information. Recruitment personnel must rigorously verify onboarding documents – such as medical examination certificates, academic credentials, identification cards, and household registration – and may only proceed with onboarding procedures after confirming the accuracy of identity information. This ensures the prevention of child labour and the avoidance of any involvement in forced labour. If it is found that an employee has provided false information or violated Group regulations, the labour contract will be immediately terminated or dissolved in accordance with internal policies, and appropriate measures will be taken based on the specific circumstances.

Regarding working hours management, the Group has established the *Work Regulation and Salary Regulations* to standardize recruitment processes and clarify departmental responsibilities. These measures systematically regulate key aspects such as personnel recruitment, leave policies, and working hours management, clearly defining working hours and overtime arrangements to prevent forced labour, avoid violations of labour standards, and effectively safeguard employees' rights and interests. Should such violations be identified, the Group will address them with due seriousness in accordance with actual circumstances and internal regulations.

B5. Supply Chain Management

To establish a comprehensive supply chain management system for the Group and to enhance operational efficiency and sustainable development capabilities, the Group has formulated the Supplier Management Policy to standardise the management of all material and goods procurement activities within the Group. The Group achieves supply chain optimisation and upgrading through the following core initiatives: establishing standardised supplier admission and evaluation mechanisms, promoting information sharing and cost control, and strengthening supply security systems to ensure a stable and reliable supply chain. By integrating the concept of green procurement into management processes, prioritising environmentally certified products, and promoting sustainable development throughout all stages of the supply chain, we achieve the synergistic development of economic benefits and environmental responsibility.

Supplier Management System

The Group's supply chain management is founded on a multi-departmental collaborative mechanism, through which the *Supplier Management Policy* is formulated and implemented.

In comprehensive supplier management, the Group leverages the surrounding industry ecosystem and internet platforms to actively expand channels and extensively identify potential partners. For newly introduced suppliers, the Group rigorously enforces qualification assessments and price review procedures. During the admission stage, suppliers are required to thoroughly complete the Supplier Qualification Questionnaire and other relevant documentation. Subsequently, a multi-departmental joint review team, comprising professionals from the Procurement Department, Quality Assurance Department, and Technical Management Department, conducts a comprehensive and in-depth evaluation of suppliers across four key dimensions: price competitiveness, technical process capability, quality standards, and supply chain security.

B5. 供應鏈管理

供應商管理體系

本集團供應鏈管理基於多部門協 同合作機制,制定並實施《供應商 管理制度》。

環境、社會及管治報告

Additionally, the Group implements a supplier grading management system, categorising suppliers as "Good, Average, or Poor". Differentiated management measures are applied according to each category, such as rewarding high-quality suppliers, supporting potential suppliers, and eliminating or blacklisting unqualified suppliers. Furthermore, a dynamic maintenance mechanism has been established. The Procurement Department regularly reviews core supplier documentation, and every six months, conducts a freeze confirmation for suppliers with whom there has been no long-term cooperation, processing them according to established procedures. This ensures that the supplier management system consistently remains scientific and effective.

The Group adopts a diversified supplier strategy for the same product, typically maintaining cooperative relationships with two to three suppliers. If a supplier's delivery is affected by force majeure factors such as weather, the supplier switching mechanism can be promptly activated to ensure that other suppliers can continue timely supply, thereby safeguarding the stability and continuity of the supply chain. For domestic procurement operations, the overall delivery cycle is reasonable. As a result, most assets face a low risk of storage issues caused by weather factors during procurement and inventory management processes, effectively mitigating potential risks such as inventory backlog and asset loss that may arise from weather-related factors.

During the Reporting Period, the Group implemented relevant management systems for 83 new suppliers.

Case Study: Supplier Collaboration Conference

During the Reporting Period, the Group successfully convened its Annual Supplier Collaboration Conference, bringing together nearly one hundred high-quality supplier partners from across the country. This significant event was not only a sincere expression of gratitude for the long-term and steadfast support of our suppliers, but also an important opportunity for both parties to deepen cooperation amid the current complex economic environment. The successful convening of the conference not only demonstrated the Group's strong commitment to supply chain partnerships but also laid a solid foundation for promoting sustainable and high-quality business development for both parties.

Responsible procurement

The Group consistently integrates environmental responsibility, social responsibility, and ethical business practices throughout the entire supply chain management process, strictly adhering to principles of compliance and sustainable development from supplier onboarding to daily management.

During the supplier admission process, the Group enforces stringent qualification standards. New suppliers are required to hold environmental protection permits relevant to their respective industries, ensuring their qualifications are closely aligned with the Group's sustainable development strategy. For manufacturing suppliers who have already obtained government environmental protection permits (such as wire manufacturers), the Group upholds the principles of pragmatism and efficiency by refraining from imposing redundant environmental assessment criteria, thereby reducing the burden on suppliers while ensuring compliance. Furthermore, we conduct comprehensive and thorough audits of suppliers' business reputation and compliance records, requiring them to maintain a strong business track record with no major violations or ethical deficiencies. We are committed to eliminating any form of improper benefit transfer, thereby ensuring supplier quality at the source.

負責任採購

本集團始終將環境責任、社會責任及道德商業實踐融入供應鏈管理的全流程,從供應商准入到日常管理,均嚴格遵循合規經營與可持續發展原則。

在供應商准入環節,本集團執行 嚴格的資質匹配標準。一方面, 要求新供應商必須持有所屬行業 的環保許可,確保其資質與集團 可持續發展戰略高度契合。對於 已獲得政府環保許可的生產型供 應商(如電線生產企業),秉持務 實高效原則,不再增設重複性環 保考核指標,在保證合規的同時 減輕供應商負擔。另一方面,全 面、深入審核供應商的商業信譽 與合規記錄,要求供應商具備良 好的營商記錄,無重大違規行為 或商業道德瑕疵,堅決杜絕任何 形式的不當利益輸送,從源頭把 控供應商質量。

環境、社會及管治報告

During the procurement execution phase, we actively implement green procurement policies. We prioritise the use of environmentally-friendly materials, adopt minimalist packaging, and select products with recyclable features. This significantly reduces the proportion of single-use material procurement and effectively enhances environmental awareness throughout the supply chain.

In terms of resource recycling, the Group actively collaborates with suppliers to implement the recycling of obsolete assets. For packaging materials such as wooden frames and large cartons used for the transportation and securing of machining centres, suppliers are required to simultaneously collect recyclable waste items upon delivery. By adopting a closed-loop management model, the Group achieves efficient resource reuse and effectively reduces resource waste throughout its operations.

Meanwhile, the Group continuously enhances its risk management system. Through regular assessments and dynamic monitoring, it consistently optimises procurement processes to ensure full compliance and the effectiveness of the management system, thereby achieving a deep integration of business value and social responsibility.

To further enhance supplier management, the Group organises a professional team every six months to conduct on-site assessments at suppliers' manufacturing facilities. By means of on-site introductions from suppliers and direct observation of changes in production line personnel, we gain a thorough understanding of their energy usage, production operations, and other actual conditions. This enables us to accurately assess their business development and ensure that suppliers consistently meet the Company's high standards. In the past reporting year, the Group's supply chain system remained stable, and no suppliers were replaced due to environmental protection issues.

在採購執行環節,大力推行綠色 採購政策。優先選擇使用環保材 料、採用簡約包裝且具備循環利 用特性的產品,顯著降低一次性 物資採購比例,有效推動供應鏈 整體環保意識的提升。

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Key audit matter 關鍵審計事項

Provision for impairment of inventories 存貨減值準備

The gross balance of inventories as at 31 March 2025 was RMB937,207,000, against which a provision for inventories amounting to RMB6,863,000 was made. The inventory balance comprises raw materials, work in progress and finished goods. At the end of the year, inventories were measured at the lower of cost and net realisable value. 於二零二五年三月三十一日,存貨餘額為人民幣937,207千元,計提存貨準備金人民幣6,863千元。存貨餘額包括原材料、在產品和產成品。年末存貨按成本與可變現淨值孰低計量。

The Group's management reviews the inventory ageing list to identify slow-moving and obsolete inventories and then estimates the amount of provision for slowing-moving and obsolete inventories. The determination of provision for slow-moving and obsolete inventories requires management to exercise judgement in identifying slow-moving and obsolete inventories and make estimates of the appropriate level of provision required.

本集團管理層審閱存貨賬齡清單以識別滯銷和陳舊存貨,然 後估計滯銷和陳舊存貨的撥備金額。釐定滯銷及陳舊存貨撥 備需要管理層在識別滯銷及陳舊存貨時作出判斷,並估計所 需撥備的適當水平。 How our audit addressed the key audit matter 該事項在審計中是如何應對的

Our audit procedures included the following: 我們通過如下程序檢查管理層做出的估計:

We discussed with management to obtain an understanding of management's assessment in estimating the provision for impairment of inventories.

我們與管理層進行了討論,以了解管理層對滯銷和過時存貨的評估。

We examined management's assessment by observing the physical condition of the inventories, and performed the inventory count on a sampling basis.

我們在年末觀察了存貨盤點和存貨的物理狀況以驗證管理層 的評估。

We compared the net realisable value of estimated selling price, after deducting the estimated costs of completion and the estimated costs necessary to make the sale, with the carrying amount, and traced to the source documents. 我們將賬面價值與預計銷售價格扣除預計完成成本、預計銷售費用後得到的可變現淨值進行比較,並查看了原始單據。

Key audit matter 關鍵審計事項

How our audit addressed the key audit matter 該事項在審計中是如何應對的

Provision for impairment of inventories 存貨減值準備

The above process also involves management's estimation of the quantity of those inventories in excess of projected usage, consideration of the production plan and expected future market demand as a result of changes in current market conditions and technology.

此過程還涉及管理層對這些庫存的預計過量數量的估計,考 慮到當前市場條件和技術變化導致的生產計劃和預期的未來 市場需求。

The Group's management also assesses the net realisable value of inventories based on the latest invoice prices, the estimated cost to be incurred to completion, the estimated selling expenses and taxes.

本集團管理層還根據最新發票價格、預計完工成本、預計銷 售費用和税金評估存貨的可變現淨值。

We focused on this area because it required a high level of management judgement and estimation and the amounts involved were significant.

我們關注這一領域,因為它需要高水平的管理層判斷,而且 涉及的金額很大。

Related disclosures are included in note 2.4, note 3 and note 17 to the consolidated financial statements. 相關披露載於綜合財務報表附註2.4、附註3及附註17。

We checked the accuracy of the inventory ageing list, analysed the inventory turnover rate, and compared the planned consumption to the historical consumption and production plan on a sampling basis to verify the reasonableness of the provision for slow-moving inventories.

我們抽樣檢查了存貨賬齡的準確性,分析了存貨周轉情況,並通過對比歷史的消耗量,抽樣檢查存貨計劃消耗量的合理性。

We also assessed the adequacy of the Group's disclosures of the provision for inventories in the consolidated financial statements.

我們亦評估了本集團在綜合財務報表中披露存貨撥備的充分 性。

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

合理保證是高水準的保證,但不能保證按照《香港審計準則》進行的審計,在某一重大錯報存在時總能發現。錯報可以由欺詐或錯誤引起,如果合理預期它們單獨或匯總起來可能影響合併財務報表使用者依賴合併財務報表所作出的經濟決定,則有關的錯報可被視作重大。

在根據《香港審計準則》進行審計的過程中,我 們運用了專業判斷,保持了專業懷疑態度。我們 亦:

- 識別和評估由於欺詐或錯誤而導致合併 財務報表存在重大錯報的風險,設入 執行審計程序以應對這些風險,以及獲 取充足和適當的審計憑證,作為我們意 見的基礎。由於欺詐可能涉及串謀、偽 造、蓄意遺漏、虚假陳述,或淩駕於內 部控制之上,因此未能發現因欺詐而導 致的重大錯報的風險高於未能發現因錯 誤而導致的重大錯報的風險。
- 瞭解與審計相關的內部控制,以設計適當的審計程序,但目的並非對 貴集團內部控制的有效性發表意見。
- 評價董事所採用會計政策的恰當性及作 出會計估計和相關披露的合理性。

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

2. ACCOUNTING POLICIES

2.1 BASIS OF PREPARATION

These financial statements have been prepared in accordance with IFRS Accounting Standards (which include all International Financial Reporting Standards, International Accounting Standards ("IASs") and Interpretations) issued by the International Accounting Standards Board ("IASB"), and the disclosure requirements of the Hong Kong Companies Ordinance. They have been prepared under the historical cost convention, except for notes receivable and equity investments which have been measured at fair value. These financial statements are presented in Renminbi, and all values are rounded to the nearest thousand except when otherwise indicated.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries (collectively referred to as the "**Group**") for the year ended 31 March 2025. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has the rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

Generally, there is a presumption that a majority of voting rights results in control. When the Company has, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee:
- (b) rights arising from other contractual arrangements; and
- (c) the Group's voting rights and potential voting rights.

2. 會計政策

2.1 編製基準

合併基礎

一般來說,有一種假設,即大多數投票權導致控制權。當本公司擁有少於被投資方大多數的表決或類似權利,在評估其是否擁有對被投資方的權力時,本集團會考慮所有相關事實及情況,包括:

- (a) 與被投資方其他表決權持 有人的合同安排;
- (b) 其他合同安排產生的權 利;及
- (c) 本集團的表決權及潛在表 決權。

財務報表附註

Year ended 31 March 2025 截至二零二五年三月三十一日止年度

2. ACCOUNTING POLICIES (Continued)

2.1 BASIS OF PREPARATION (Continued)

Basis of consolidation (Continued)

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows related to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, any non-controlling interest and exchange fluctuation reserve and recognises the fair value of any investment retained and any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified as profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

2. 會計政策(續)

2.1 編製基準(續)

合併基礎(續)

附屬公司的財務報表與本公司的 報告期間一致,會計政策一致。 附屬公司之經營業績從集團取得 控制權之日起綜合計算,並繼續 計算至該控制停止。

如果事實和情形表明上述所描述 的三個控制因素有一個或以上發 生改變,本集團需重新評估其是 否繼續控制被投資公司。附屬公 司中所有權的變動在非失去控制 權的情況下,作為股權交易處理。

Year ended 31 March 2025 截至二零二五年三月三十一日止年度

2. ACCOUNTING POLICIES (Continued)

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The Group has adopted the following revised IFRS Accounting Standards for the first time for the current year's financial statements.

Amendments to IFRS 16 Lease Liability in a Sale and

Leaseback

Amendments to IAS 1 Classification of Liabilities as

Current or Non-current (the "2020 Amendments")

Amendments to IAS 1 Non-current Liabilities with Covenants

(the "2022 Amendments")

Amendments to IAS 7 and

IFRS 7

Supplier Finance Arrangements

The nature and the impact of the revised IFRS Accounting Standards are described below:

(a) Amendments to IFRS 16 specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains. Since the Group has no sale and leaseback transactions with variable lease payments that do not depend on an index or a rate occurring from the date of initial application of IFRS 16, the amendments did not have any impact on the financial position or performance of the Group.

2.2 會計政策的變更及披露

國際會計準則第1號 將負債分類為流動或 (修訂本) 非流動(「**2020年**

國際會計準則第7號及 供應商融資安排 國際財務報告準則

第7號(修訂本)

本集團所採納的經修訂國際財務 報告準則的性質及影響載於下文:

國際財務報告準則第16號 (a) (修訂本)明確了賣方一承 租人計量售後租回交易產 生的租賃負債時適用的規 定,以確保賣方-承租人 不會確認與所保留使用權 有關的任何損益金額。由 於本集團自首次應用國際 財務報告準則第16號日期 起並無涉及可變租賃付款 (並非視乎指數或比率而 定)的售後租回交易,故該 等修訂不會對本集團的財 務狀況或表現產生任何影 響。

2. ACCOUNTING POLICIES (Continued)

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (Continued)

(b) The 2020 Amendments clarify the requirements for classifying liabilities as current or non-current, including what is meant by a right to defer settlement and that a right to defer must exist at the end of the reporting period. Classification of a liability is unaffected by the likelihood that the entity will exercise its right to defer settlement. The amendments also clarify that a liability can be settled in its own equity instruments, and that only if a conversion option in a convertible liability is itself accounted for as an equity instrument would the terms of a liability not impact its classification. The 2022 Amendments further clarify that, among covenants of a liability arising from a loan arrangement, only those with which an entity must comply on or before the reporting date affect the classification of that liability as current or non-current. Additional disclosures are required for non-current liabilities that are subject to the entity complying with future covenants within 12 months after the reporting period.

The Group has reassessed the terms and conditions of its liabilities as at 1 April 2023 and 2024 and concluded that the classification of its liabilities as current or non-current remained unchanged upon initial application of the amendments. Accordingly, the amendments did not have any impact on the financial position or performance of the Group.

2. 會計政策(續)

2.2 會計政策的變更及披露(續)

(b) 2020年修訂本澄清了將 負債分為流動或非流動的 規定,包括於報告期間結 束日必須具有遞延清償權 利及遞延權利的含義。負 债的分類不受實體行使其 遞延清僧權利的可能性的 影響。該等修訂亦澄清, 自信可以其本身的權益工 具清償, 且僅當可轉換負 工具入賬時,負債的條款 才不會影響其分類。2022 年修訂進一步澄清,在貸 款安排所產生的債務契諾 中,只有實體必須於報告 日期或之前遵守的契諾會 影響該負債的流動或非流 動分類。實體就須於報告 期後12個月內遵守未來契 諾的非流動負債,應當作 出額外披露。

> 本集團已重新評估其於 2023年及2024年4月1日 的負債條款及條件,並得 出結論認為,其負債認為,其負債 動或非流動分類於首次。 用修訂後保持不變 此,該等修訂並未對產 性何影響。

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (Continued)

Amendments to IAS 7 and IFRS 7 clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk. As the Group does not have supplier finance arrangements, the amendments did not have any impact on the Group's financial statements.

2.3 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS (Continued)

Except for the new IFRS Accounting Standards mentioned below, the directors of the Company anticipate that the application of all other amendments to IFRS Accounting Standards will have no material impact on the consolidated financial statements in the foreseeable future.

IFRS 18 replaces IAS 1 Presentation of Financial Statements. While a number of sections have been brought forward from IAS 1 with limited changes, IFRS 18 introduces new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Entities are required to classify all income and expenses within the statement of profit or loss into one of the five categories: operating, investing, financing, income taxes and discontinued operations and to present two new defined subtotals. It also requires disclosures about management-defined performance measures in a single note and introduces enhanced requirements on the grouping (aggregation and disaggregation) and the location of information in both the primary financial statements and the notes. Some requirements previously included in IAS 1 are moved to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, which is renamed as IAS 8 Basis of Preparation of Financial Statements. As a consequence of the issuance of IFRS 18, limited, but widely applicable, amendments are made to IAS 7 Statement of Cash Flows, IAS 33 Earnings per Share and IAS 34 Interim Financial Reporting. In addition, there are minor consequential amendments to other IFRSs. IFRS 18 and the consequential amendments to other IFRSs are effective for annual periods beginning on or after 1 January 2027 with earlier application permitted. Retrospective application is required. The Group is currently analysing the new requirements and assessing the impact of IFRS 18 on the presentation and disclosure of the Group's financial statements.

2.3 已頒佈但尚未生效的國際財務 報告準則會計準則(續)

除下文所述之新訂國際財務報告 準則會計準則外,本集團預期於 可預見未來應用所有其他經修訂 國際財務報告準則會計準則將不 會對綜合財務報表造成重大影響。

國際財務報告準則第18號取代 國際會計準則第1號財務報表的 呈列。儘管國際會計準則第1號 的多個部分已被繼承並作出有限 變動,但國際財務報告準則第18 號對損益表內的呈列方式引入新 規定,包括指定總計及小計。實 體須將損益表內的所有收入及開 支分類為五個類別之一:經營、 投資、融資、所得税及已終止經 營業務,並呈列兩個新界定的小 計。其亦規定在單一附註中披露 管理層界定的績效指標,並對主 要財務報表及附註中的組合(總計 及分類)及資訊位置提出更高的規 定。之前包含在國際會計準則第 1號的部分規定已移至國際會計準 則第8號會計政策、會計估計變動 及錯誤,並重新命名為國際會計 準則第8號財務報表的編製基準。 由於國際財務報告準則第18號的 頒佈,國際會計準則第7號現金流 量表、國際會計準則第33號每股 盈利及國際會計準則第34號中期 財務報告已作出有限但廣泛適用 的修訂。此外,其他國際財務報 告準則會計準則亦有輕微相應修 訂。國際財務報告準則第18號及 其他國際財務報告準則會計準則 的相應修訂於2027年1月1日或之 後開始的年度期間生效,並可提 早應用,且須追溯應用。本集團 現正分析新規定及評估國際財務 報告準則第18號對本集團財務報 表的呈列及披露的影響。

2.4 MATERIAL ACCOUNTING POLICIES

Fair value measurement

The Group measures its notes receivable and equity investments at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

公允價值計量

本集團在每期報告日,以公允價 值計量其應收票據和初始確認時 指定為以公允價值計量且其變動 計入其他綜合收益的股權投資。 公允價值是指在計量日,市場參 與者在正常交易活動中銷售資產 收到或者清僧債務所支付的金 額。公允價值計量基於假設銷售 資產或清償債務的交易發生於該 資產或債務的主要市場,或者在 缺失主要市場的情況下,發生在 最有利於該資產或負債的市場。 主要市場或者最優市場必須是本 集團可以參與的市場。一項資產 或負債的公允價值計量基於一項 假設,即當市場參與者進行定價 時會考慮使他們的經濟利益最大 化。

非金融資產公允價值的計量需考慮市場參與者在最優化使用該資產或者將其銷售給另一個能夠最優化使用該資產的市場參與者的情況下產生經濟利益的能力。

本集團使用在不同的情形下使用 適當的估值技術,為準確計量公 允價值需獲取充足的數據,最大 化使用相關可觀測因素,最小化 使用不可觀察因素。

2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Fair value measurement (Continued)

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

公允價值計量(續)

所有在財務報表以公允價值計量 和披露的資產和負債,可基於最 低級別確定公允價值的相關重要 因素,對公允價值的層級分類, 分類如下:

- 第一層級 採用活躍市場中未更 正的報價確定特定資 產或負債公允價值 (未經調整)。
- 第二層級 採用估值技術確定公 允價值的,所有對計 量的公允價值具有重 大影響的數據均為可 觀察且可直接或間接 地取自公開市場。
- 第三層級 採用估值技術確定公 允價值的,所有對計 列的公允價值具有重 大影響的數據並非基 於可觀察公開市場數 據。

在資產負債表持續存在的資產和 負債,本集團需考慮公允價值的 層級分類在每期報告日是否發生 轉變(基於確定公允價值最低限度 因素的考慮)。

2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, deferred tax assets, financial assets and non-current assets), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

In testing a cash-generating unit for impairment, a portion of the carrying amount of a corporate asset (e.g., a headquarters building) is allocated to an individual cash-generating unit if it can be allocated on a reasonable and consistent basis or, otherwise, to the smallest group of cash-generating units.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises.

Property, plant and equipment and depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Property, plant and equipment and depreciation (Continued)

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Buildings	4.5% to 9.0%
Plant and machinery	9.0% to 18.00%
Instruments and tools	18.0% to 30.0%
Furniture, fixtures and	18.0% to 30.0%
office equipment	

Motor vehicles 22.5%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in the statement of profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress is stated at cost less any impairment losses, and is not depreciated. It is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is the fair value as at the date of acquisition. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are subsequently amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. Such intangible assets are not amortised. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether the indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is accounted for on a prospective basis.

Golf membership

Purchased membership is stated at cost less any impairment losses and assessed for impairment at each year end.

Software

A purchased software is stated at cost less any impairment losses and is amortised on the straight-line basis over its estimated useful life of five years.

Research and development costs

All research costs are charged to the statement of profit or loss as incurred.

Expenditure incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets as follows:

Leasehold land 39 to 50 years Buildings 1 to 5 years

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

(b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value quarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

The Group elected to present the lease liabilities separately in the statement of financial position.

(c) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of building, machinery and equipment that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the recognition exemption for leases of low-value assets to leases of office equipment that is considered to be of low value.

Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Investments and other financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income, and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under IFRS 15 in accordance with the policies set out for "Revenue recognition" below.

Investments and other financial assets (Continued)

Initial recognition and measurement (Continued)

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Financial assets at fair value through other comprehensive income (debt instruments)

For debt investments at fair value through other comprehensive income, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in profit or loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in other comprehensive income. Upon derecognition, the cumulative fair value change recognised in other comprehensive income is recycled to profit or loss.

Financial assets designated at fair value through other comprehensive income (equity investments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity investments designated at fair value through other comprehensive income when they meet the definition of equity under IAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to the statement of profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in other comprehensive income. Equity investments designated at fair value through other comprehensive income are not subject to impairment assessment.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

2.4 MATERIAL ACCOUNTING POLICIES (Continued)

Derecognition of financial assets (Continued)

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

The Group recognises an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At each reporting date, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information.

The Group considers a financial asset in default when contractual payments are 180 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Debt investments at fair value through other comprehensive income and financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables and contract assets which apply the simplified approach as detailed below.

- Stage 2 Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs
- Stage 3 Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

Simplified approach

For trade receivables that do not contain a significant financing component or when the Group applies the practical expedient of not adjusting the effect of a significant financing component, the Group applies the simplified approach in calculating ECLs. Under the simplified approach, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and notes payables, financial liabilities included in other payables and accruals and lease liabilities.

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at amortised cost (trade and note payables, other payables, and lease liability)

After initial recognition, trade and notes payables, other payables and lease liabilities are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in profit or loss.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Treasury shares

Own equity instruments which are reacquired and held by the Group (treasury shares) are recognised directly in equity at cost. No gain or loss is recognised in the statement of profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined on a weighted average basis and, in the case of work in progress and finished goods, comprises direct materials, direct labour and an appropriate proportion of overheads. Net realisable value is based on estimated selling prices less estimated costs to be incurred to completion and disposal.

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and at banks, and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

Provisions

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the statement of profit or loss.

The Group provides for warranties in relation to the sale of certain industrial products during the warranty period. Provisions for these assurance-type warranties granted by the Group are initially recognised based on sales volume and past experience of the level of returns, discounted to their present values as appropriate. The warranty-related cost is revised annually.

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences; and
- in respect of taxable temporary differences associated with investments in subsidiaries when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

- in respect of deductible temporary differences associated with investments in subsidiaries, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods in which the costs, for which it is intended to compensate, are expensed.

Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to profit or loss over the expected useful life of the relevant asset by equal annual instalments or deducted from the carrying amount of the asset and released to profit or loss by way of a reduced depreciation charge.

Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of goods or services is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Group will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

When the contract contains a financing component which provides the customer with a significant benefit of financing the transfer of goods or services to the customer for more than one year, revenue is measured at the present value of the amount receivable, discounted using the discount rate that would be reflected in a separate financing transaction between the Group and the customer at contract inception.

When the contract contains a financing component which provides the Group with a significant financial benefit for more than one year, revenue recognised under the contract includes the interest expense accreted on the contract liability under the effective interest method. For a contract where the period between the payment by the customer and the transfer of the promised goods or services is one year or less, the transaction price is not adjusted for the effects of a significant financing component, using the practical expedient in IFRS 15.

(a) Sale of products

Revenue from the sale of industrial products is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the industrial products.

Some contracts for the sale of industrial products provide customers with rights of return, giving rise to variable consideration.

(i) Rights of return

For contracts which provide a customer with a right to return the goods within a specified period, the expected value method is used to estimate the goods that will not be returned because this method best predicts the amount of variable consideration to which the Group will be entitled. The requirements in IFRS 15 on constraining estimates of variable consideration are applied in order to determine the amount of variable consideration that can be included in the transaction price. For goods that are expected to be returned, instead of revenue, a refund liability is recognised. A right-of-return asset (and the corresponding adjustment to cost of sales) is also recognised for the right to recover products from a customer.

(b) Rendering of services

Revenue from the rendering of services is recognised at the point in time when the services are rendered.

Revenue recognition (Continued)

Other income

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

Contract liabilities

A contract liability is recognised when a payment is received or a payment is due (whichever is earlier) from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

Right-of-return assets

A right-of-return asset is recognised for the right to recover the goods expected to be returned by customers. The asset is measured at the former carrying amount of the goods to be returned, less any expected costs to recover the goods and any potential decreases in the value of the returned goods. The Group updates the measurement of the asset for any revisions to the expected level of returns and any additional decreases in the value of the returned goods.

Refund liabilities

A refund liability is recognised for the obligation to refund some or all of the consideration received (or receivable) from a customer and is measured at the amount the Group ultimately expects it will have to return to the customer. The Group updates its estimates of refund liabilities (and the corresponding change in the transaction price) at the end of each reporting period.

Share-based payments

The Company operates a restricted share unit scheme. Employees (including directors) of the Group receive remuneration in the form of share-based payments, whereby employees render services in exchange for equity instruments ("equity-settled transactions"). The cost of equity-settled transactions with employees for grants under a restricted share unit scheme is measured by reference to the fair value at the date at which they are granted. The fair value is determined at the closing price of the shares at the grant date, less considerations received from the grantees (if any), further details of which are given in note 27 to the financial statements.

The cost of equity-settled transactions is recognised in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The charge or credit to the statement of profit or loss for a period represents the movement in the cumulative expense recognised as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

Share-based payments (Continued)

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognised. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification. Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately.

Pension scheme

The employees of the Group's subsidiaries which operate in Mainland China are required to participate in a central pension scheme operated by the local municipal government. These subsidiaries are required to contribute a certain percentage of their payroll costs to the central pension scheme. The contributions are charged to profit or loss as they become payable in accordance with the rules of the central pension scheme.

Events after the reporting period

If the Group receives information after the reporting period, but prior to the date of authorisation for issue, about conditions that existed at the end of the reporting period, it will assess whether the information affects the amounts that it recognises in its financial statements. The Group will adjust the amounts recognised in its financial statements to reflect any adjusting events after the reporting period and update the disclosures that relate to those conditions in light of the new information. For non-adjusting events after the reporting period, the Group will not change the amounts recognised in its financial statements, but will disclose the nature of the non-adjusting events and an estimate of their financial effects, or a statement that such an estimate cannot be made, if applicable.

Dividends

Final dividends are recognised as a liability when they are approved by the shareholders in a general meeting. Proposed final dividends are disclosed in the note 11 to the financial statements. Interim dividends are simultaneously proposed and declared, because the Company's memorandum and articles of association grant the directors the authority to declare interim dividends. Consequently, interim dividends are recognised immediately as a liability when they are proposed and declared.

Foreign currencies

These financial statements are presented in Renminbi ("RMB"), which is the Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. All differences are taken to profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss, respectively).

In determining the exchange rate on initial recognition of the related asset, expense or income on the derecognition of a non-monetary asset or non-monetary liability relating to an advance consideration, the date of initial transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of the advance consideration.

3. SIGNIFICANT ACCOUNTING 3. 重大會計判斷和估計 JUDGEMENTS AND ESTIMATES

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the financial statements:

Withholding tax arising from the distribution of dividends

The Group's determination as to whether to accrue deferred tax liabilities in respect of withholding taxes arising from the distribution of dividends by certain subsidiaries according to the relevant tax rules enacted in the jurisdictions is subject to judgement on the plan of the distribution of dividends, based upon the likely distribution level of such earnings from these subsidiaries in the foreseeable future. The carrying value of deferred tax liabilities arising from the withholding tax associated with the investments in subsidiaries in Mainland China for the year ended 31 March 2025 was RMB116,361,000 (31 March 2024: RMB91,280,000). Further details are contained in note 24 to the financial statements.

編製本集團財務報表要求管理層作出影響收入、費用、資產及負債及其附帶披露之報告金額及或有負債之披露的判斷、估計及假設。此等假設及估計之不確定性可能會導致可能需要對未來受影響之資產或負債之賬面價值進行重大調整的結果。

判斷

在應用本集團會計政策的過程中,除涉及估計的判斷外,管理層做出了對財務報表確認金額影響最大的判斷:

股息分配產生的預扣稅

本集團根據司法管轄區制定的相關稅收 規則確定是否就某些附屬公司分配股息 產生的預扣稅項計提遞延所得稅負債, 取決於對股息分配方案的判斷,基於配 些附屬公司在可預見的未來可能分配的 收益水平。截至二零二五年三月三十一 日止年度,與投資中國內地附屬公司 關的預扣稅項產生的遞延所得稅負 面值為人民幣116,361千元(二零二四年 三月三十一日:人民幣91,280千元)。更 多詳情載於財務報表附註24。

3. SIGNIFICANT ACCOUNTING 3. 重大會計判斷和估計(續) JUDGEMENTS AND ESTIMATES (Continued)

Judgements (Continued)

Deferred tax assets

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

The Group has tax losses of RMB10,862,000 (2024: RMB10,134,000) carried forward. These losses related to subsidiaries that have a history of losses, have not expired, and may not be used to offset taxable income elsewhere in the Group. The subsidiaries have neither any taxable temporary difference nor any tax planning opportunities available that could partly support the recognition of these losses as deferred tax assets. On this basis, the Group has determined that it cannot recognise deferred tax assets on the tax losses carried forward. Further details on deferred taxes are disclosed in note 24 to the financial statements.

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

判斷(續)

遞延税項資產

未被動用稅項虧損乃被確認為遞延稅項 資產,惟以應課稅盈利可能可用作抵扣 可動用之虧損為限。管理層須根據未來 應課稅盈利之可能時間及數額連同未來 納稅計劃策略作出重大判斷,以釐定可 予確認之遞延稅項資產金額。

本集團有結轉稅項虧損人民幣10,862千元(2024年:人民幣10,134千元)。該等虧損涉及曾錄得虧損的子公司,尚未屆滿且未必可用於抵銷本集團其他地方應課稅收入。該等子公司並無任何應課稅收入。該等子公司並無任何應課稅收入。該等子公司並無任何應課稅項計劃機會可部分支持將該等虧損確認為遞延稅項計劃機項資產。為此,本集團確定其無法就已結轉稅項虧損確認遞延稅項資產。有關遞延稅項的進一步詳情於財務報表附註24中披露。

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (Continued)

Estimation uncertainty (Continued)

(i) Provision for expected credit losses on trade receivables

The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns according to the sales type, customer type and rating.

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At each reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation among historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of a customer's actual default in the future. The information about the ECLs on the Group's trade receivables is disclosed in note 18 to the financial statements.

Estimation uncertainty (Continued)

(ii) Impairment of non-financial assets (other than aoodwill)

The Group assesses whether there are any indicators of impairment for all non-financial assets (including the right-of-use assets) at the end of each reporting period. Indefinite life intangible assets are tested for impairment annually and at other times when such an indicator exists. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value-in-use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

(iii) Useful lives of property, plant and equipment

The Group determines the estimated useful lives and related depreciation charges for its property, plant and equipment. This estimate is based on the historical experience of the actual useful lives of property, plant and equipment of similar nature and functions. It could change significantly as a result of technical innovations, or competitor actions in response to severe industry cycles. Management will increase the depreciation charge where useful lives are shorter than previously estimated lives, or it will write off or write down technically obsolete or non-strategic assets that have been abandoned. Further details are contained in note 13 to the financial statements.

(iii) 物業、廠房及設備的使用壽命

本集團為其物業、廠房及設備確 定估計可使用年期及相關折舊費 用。此估計乃基於性質及功能相 似的物業、廠房及設備的實際可 使用年限的過往經驗。由於技術 創新或競爭對手為應對嚴重的行 業週期而採取的行動,它可能會 發生重大變化。如果使用年限低 於先前估計的年限,管理層將增 加折舊費用,或者將註銷或減記 已廢棄的技術過時或非戰略性資 產。更多詳情載於財務報表附註 13 •

(iv) Impairment of inventories

Net realisable value of an inventory item is the estimated selling price in the ordinary course of business, less estimated costs to be incurred to completion and disposal. These estimates are based on the current market condition and the historical experience of selling products of a similar nature which could change significantly as a result of changes in customer taste or competitor actions in response to severe consumer product industry cycles. Management reassesses these estimates at each reporting date. Further details are contained in note 17 to the financial statements.

SIGNIFICANT ACCOUNTING 3. JUDGEMENTS AND ESTIMATES (Continued)

Estimation uncertainty (Continued)

(v) Variable consideration for returns

The Group estimates variable consideration to be included in the transaction price for the sale of products with rights of return.

The Group used the historical return data to come up with expected return percentages. These percentages are applied to determine the expected value of the variable consideration. Any significant changes in experience as compared to the historical return pattern will impact the expected return percentages estimated by the Group.

The Group updates its assessment of expected returns quarterly and the refund liabilities are adjusted accordingly. Estimates of expected returns are sensitive to changes in circumstances and the Group's past experience regarding returns may not be representative of customers' actual returns in the future. As at 31 March 2025, the amount recognised as refund liabilities was RMB4,013,000 for the expected returns.

(vi) Leases - Estimating the incremental borrowing rate

The Group cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("IBR") to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group "would have to pay", which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when it needs to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in the subsidiary's functional currency). The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

退貨可變對價 (v)

本集團估計可變對價將包含在銷 售具有退貨權的產品的交易價格

本集團利用歷史退貨數據得出預 期退貨百分比。這些百分比用於 確定可變對價的預期值。與過往 退貨模式相比,經驗的任何重大 變化將影響本集團估計的預期退 貨百分比。

本集團每季度更新其對預期退貨 的評估,並相應調整退款負債。 預期回報的估計易受環境變化的 影響,本集團過往的退貨經驗未 必能代表客戶未來的實際退貨。 於二零二五年三月三十一日,確 認為退款負債的金額為人民幣 4,013千元,用於預期退貨。

租賃-估算增量借款利率 (vi)

本集團無法輕易確定租賃中的內 含利率,因此,本集團使用遞增 借款利率(「遞增借款利率」)計量 租賃負債。遞增借款利率為本集 團於類似經濟環境中為取得與使 用權資產價值相近的資產,而以 類似抵押品與類似期間借入所需 資金應支付的利率。因此,遞增 借款利率反映了本集團「應支付」 的利率,當無可觀察的利率時(如 就並無訂立融資交易的附屬公司 而言)或當須對利率進行調整以反 映租賃的條款及條件時(如當租賃 並非以附屬公司的功能貨幣訂立 時),則須作出利率估計。當可觀 察輸入數據可用時,本集團使用 可觀察輸入數據(如市場利率)估 算遞增借款利率並須作出若干實 體特定的估計(如附屬公司的獨立 信貸評級)。

^{*} Trade receivables include trade receivables from the Controlling Shareholder and other related parties (note 31(c)).

Customers are usually required to make payment in advance before the Group delivers goods to them. However, the Group's trading terms with certain major customers with good repayment history and high reputations are on credit. The credit period is generally one to six months. The Group seeks to maintain strict control over its outstanding receivables and has a credit control department to minimise credit risk. Overdue balances are reviewed regularly and actively by senior management. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. Trade receivables are unsecured and non-interest-bearing.

At 31 March 2025, the Group endorsed certain notes receivable not yet due as of year end accepted by banks in Mainland China (the "Endorsed Notes") to some of its suppliers in order to settle the trade payables due to such suppliers with a carrying amount in aggregate of RMB124,123,000 (2024: RMB236,234,000) (the "Endorsement"). In addition, the Group discounted certain notes receivable not yet due as of year end accepted by banks in Mainland China (the "Discounted Notes") with a carrying amount in aggregate of nil (2024: RMB2,205,000) (the "Discount"). In accordance with the Law of Negotiable Instruments in the PRC, the holders of the Endorsed Notes and the Discounted Notes have the right of recourse against the Group if the Mainland China banks default (the "Continuing Involvement").

* 應收貿易款項包括來自控股股東及其他關聯 方的應收貿易款項(附註31(c)).

18. TRADE AND NOTES RECEIVABLES 18. 應收貿易款項及票據(續) (Continued)

In the opinion of the directors, the Group has transferred substantially all the risks and rewards relating to certain of the Endorsed Notes and Discounted Notes accepted by large and reputable banks with amounts of RMB77,423,000 (2024: RMB94,400,000) and nil (2024: RMB2,205,000), respectively (the "Derecognised Notes"). Accordingly, the Group has derecognised the full carrying amounts of these Derecognised Notes and the associated trade payables settled by the Endorsed Notes.

The maximum exposure to loss from the Group's Continuing Involvement in the Derecognised Notes and the undiscounted cash flows to repurchase these Derecognised Notes is equal to their carrying amounts. In the opinion of the directors, the fair values of the Group's Continuing Involvement in the Derecognised Notes are not significant.

At 31 March 2025, the Group continued to recognise the full carrying amount of the remaining Endorsed Notes and the associated trade payables settled with an amount of RMB46,700,000 (2024: RMB141,834,000) because the directors believe that the Group has retained the substantial risks and rewards, which include default risks relating to such remaining Endorsed Notes.

During the year, the Group has not recognised any gain or loss on the date of transfer of the Derecognised Notes. No gains or losses were recognised from the Continuing Involvement, both during the year or cumulatively.

Notes receivable of RMB572,368,000 were classified as financial assets at fair value through other comprehensive income under IFRS 9, and RMB777,414,000 were classified as financial assets at amortized cost under IFRS 9.

董事認為,本集團已轉移與若干獲大型及知名銀行承兑的金額為人民幣77,423千元(二零二四年:人民幣94,400千元)的背書票據及金額為人民幣零元(二零二四年:人民幣2,205千元)的貼現票據有關的絕大部分風險及回報(「終止確認票據別)。因此,本集團已終止確認該等終止確認票據及以背書票據結清的相關應付貿易款項的全部賬面值。

本集團對終止確認票據的繼續涉入產生的最大損失風險以及購回該等終止確認 票據的未折現現金流量等於其賬面價值。董事認為,本集團繼續涉入終止確 認票據的公允價值並不重大。

於二零二五年三月三十一日,本集團繼續確認剩餘背書票據及相關應付貿易款項,金額為人民幣46,700千元(二零二四年:人民幣141,834千元)原因為董事相信本集團已保留絕大部分風險及回報,包括有關該等剩餘背書票據的違約風險。

本年度,本集團並無於轉讓終止確認票據日期確認任何損益。於年內或累計過程中概無確認繼續涉入產生的損益。

根據國際財務報告準則第9號,應收票據 人民幣572,368千元分類為按公允價值計 量且其變動計入其他綜合收益的金融資 產,人民幣777,414千元分類為以攤餘成 本計量的金融資產。

33. FAIR VALUE AND FAIR VALUE 3 HIERARCHY OF FINANCIAL INSTRUMENTS

Management has assessed that the fair values of cash and bank balances, trade and note receivables, trade and notes payables, financial assets included in prepayments, other receivables and other assets and financial liabilities included in other payables and accruals and lease liabilities approximate to their carrying amounts largely due to the short-term maturities of these instruments.

The Group's finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance manager reports directly to the chief financial officer and the audit committee. At each reporting date, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the chief financial officer. The valuation process and results are discussed with the audit committee twice a year for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

Notes receivable held both to collect cash flows and to sell in financial assets at fair value through other comprehensive income are measured using the discounted cash flow method.

The fair values of unlisted equity investments designated at fair value through other comprehensive income have been estimated using an assets-based valuation technique based on assumptions that are not supported by observable market prices or rates. The fair value measurement of these financial instruments may involve unobservable inputs. Fair value change resulting from changes in the unobservable inputs was not significant.

33. 金融工具公允價值及公允價值層次

管理層評價其現金及銀行結餘、應收貿易款項、應付貿易款項及票據、預付款項、其他應收款以及其他資產中包含的金融資產、其他應付款項及中包含的金融負債及租賃負債的公允價值與其賬面價值相若,主要由於該等金融工具的到期日較短。

本集團的財務部門由財務經理領導,負責就金融工具的公允價值計量制定政策及程序。財務經理直接向財務總監及審核委員會匯報。於各報告日期,財務部門分析金融工具價值變動及釐定應用於估值的主要輸入數據。該估值由財務報告的監審閱及批准。中期和年度財務報告的評估過程和結果會每年與審計委員討論兩次。

金融資產及負債的公允價值按當前交易中(強迫或清盤出售除外)雙方自願交換的工具之金額入賬。用於估計公允價值的方法及假設如下:

持有目的為回收現金流以及出售的應收 票據計入按公允價值計量且其變動計入 其他綜合收益的金融資產,採用折現現 金流量法計量。

指定為以公允價值計量且其變動計其他綜合收益的股權投資的公允價值已使用基於資產的估值技術進行估計,該估值技術基於沒有可觀察市場價格或利率支援的假設。這些金融工具的公允價值計量可能涉及不可觀察的輸入值。不可觀察輸入值的變化導致的公允價值變化並不顯著。
