The trustee is HSBC Institutional Trust Services (Asia) Limited (the "Trustee").

The CSOP A50 ETF is a physical ETF which invests directly in the A50 Index securities within the PRC mainland through the QFI status of the Manager and/or the Stock Connect. The FTSE China A50 Index (the "Index") is compiled and published by FTSE International Limited. The Index operates under clearly defined rules published by the index provider and is a tradable index.

Capital Gains Tax ("CGT") Treatment

Rules governing taxes on capital gains derived by QFI from the trading of PRC Securities (including China A-Shares) was announced on 14 November 2014. NOTES TO THE UNAUDITED CONDENSED FINANCIAL STATEMENTS

1. GENERAL INFORMATION

CSOP ETF Series (the "Trust") is an umbrella unit trust governed by its trust deed dated 25 July 2012, as amended, (the "Trust Deed") and authorised by the Securities and Futures Commission of Hong Kong (the "SFC") pursuant to Section 104(1) of the Securities and Futures Ordinance. The terms of the Trust Deed are governed by the laws of Hong Kong. As at 30 June 2021, the Trust has nine sub-funds which are CSOP FTSE China A50 ETF (the "Sub-Fund"), CSOP SZSE ChiNext ETF, CSOP MSCI China A Inclusion Index ETF, ICBC CSOP S&P New China Sectors ETF, CSOP Hong Kong Dollar Money Market ETF, CSOP US Dollar Money Market ETF, CSOP CSI 500 ETF, CSOP Hang Seng TECH Index ETF and CSOP Yinhua CSI 5G Communications Theme ETF. The date of inception of the Sub-Fund was 23 August 2012. The Sub-Fund is listed on The Stock Exchange of Hong Kong Limited. CSOP Asset Management Limited, the manager of the Sub-Fund, applied and obtained approval to list Japan Depository Receipt ("JDR") which represents units of the Sub-Fund on the Tokyo Stock Exchange ("TSE"). The JDR which represents units of the Sub-Fund was listed on the TSE on 27 February 2013 and has been delisted from TSE on 9 June 2021.

The manager and the trustee of the Sub-Fund are CSOP Asset Management Limited (the "Manager") and HSBC Institutional Trust Services (Asia) Limited (the "Trustee") respectively.

The investment objective of the Sub-Fund is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the underlying index, namely, FTSE China A50 Index (the "Underlying Index"). In order to achieve the investment objective of the Sub-Fund, the Manager will primarily adopt a full replication strategy by directly investing all, or substantially all, of the assets of the Sub-Fund in index securities constituting the Underlying Index in substantially the same weightings (i.e. proportions) as these index securities have in the Underlying Index. Formerly, the Manager might also use a representative sampling strategy in exceptional circumstances. From 15 June 2020 (the "Effective Date"), the Sub-Funds added the use of financial derivative instruments under exceptional circumstances (the "FDIs"). Under exceptional circumstances (i.e. due to restrictions, suspensions of trading, limited availability of certain Index Securities, corporate events, or as the Manager believed there was significant market mispricing or foreseeable market turbulence), the Manager would invest in FDIs (mainly swaps with one or more counterparties) with no more than 15% of the Sub-Fund's NAV for investment and hedging purposes, where the Manager believed such investments would help the Sub-Fund achieved its investment objective and were beneficial to the Sub-Fund.

From 25 October 2021 (the "effective Date") the Sub-Fund changes the circumstances that the Manager may use representative sampling strategy to invest as follows:

- i. A representative sample whose performance is closely correlated with the Underlying Index, but whose constituents may or may not themselves be constituents of the Underlying Index.
- ii. Other collective investment schemes (CIS). The Sub-Fund's ability to invest in other CIS may not exceed 10% of the Net Asset Value of the Sub-Fund and the Sub-Fund will not hold more than 10% of any units issued by any single CIS.

The Manager may also invest in Financial derivative instruments (the "FDIs") (mainly swaps with one or more counterparties) with no more than 15% of the Sub-Fund's NAV for investment and hedging purposes, where the Manager believes such investments will help the Sub-Fund achieve its investment objective and are beneficial to the Sub-Fund. The swaps which may be invested by the Sub-Fund will be funded total return swap transactions whereby the Sub-Fund will pass on the relevant portion of cash to the Swap Counterparties and in return the Swap Counterparties will provide the Sub-Fund with an exposure to the economic gain/loss in the performance of the relevant Securities (net of indirect costs). Exposure of the Sub-Fund to the Index Securities (either through direct investment or FDIs) will be in substantially the same weightings (i.e. proportions) as these Index Securities have in the Underlying Index.

NOTES TO THE UNAUDITED CONDENSED FINANCIAL STATEMENTS

The Sub-Fund has been using FTSE China A50 net total return index as its underlying index.

(i) Market price risk

Market price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual instrument or factors affecting all instruments in the market.

The Sub-Fund is designated to track the performance of the FTSE China A50 Index, therefore the exposures to market risk in the Sub-Fund will be substantially the same as the tracked index. Effective from 25 October 2021, the Sub-Fund invested in unlisted funded total return swap for investment and hedging purposes, where the Manager believes such investments will help the Sub-Fund achieve its investment objective and are beneficial to the Sub-Fund. The Manager manages the Sub-Fund's exposures to market risk by ensuring that the key characteristics of the portfolio, such as security weight and industry weight, are closely aligned with the characteristics of the tracked index.

As at 30 June 2022 and 31 December 2021, the Sub-Fund's investments and derivative financial instruments were concentrated in the following industries:

9. FINANCIAL RISK MANAGEMENT (Continued)

(a) Market risk (Continued)

(i) Market price risk (Continued)

The Sub-Fund held 50 out of 50 (31 December 2021: 50 out of 50) constituent securities comprising the FTSE China A50 Index. The Sub-Fund is therefore exposed to substantially the same market price risk as the FTSE China A50 Index.

Sensitivity analysis in the event of a possible change in the index as estimated by the Manager

As at 30 June 2022, if the FTSE China A50 Index were to increase by 10% (31 December 2021: 10%) with all other variables held constant, this would increase the operating profit for the period/year by approximately RMB1,082,236,590 (31 December 2021: RMB1,013,821,081). Conversely, if the FTSE China A50 Index were to decrease by 10% (31 December 2021: 10%), this would decrease the operating profit for the period/year by an equal amount.

(ii) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flow.

As at 30 June 2022 and 31 December 2021, interest rate risk arises only from bank balances. As the bank balances held by the Sub-Fund is short term in nature and the interest arising from these interest bearing assets are immaterial, the Manager considers that changes in their fair value and future cash flows in the event of a change in market interest rates will not be material. As a result, the Manager considers sensitivity analysis of interest rate risk is not necessary to be presented.

(iii) Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Sub-Fund is not exposed to currency risk arising from balances and transactions in foreign currencies as the majority of its assets and liabilities are denominated in RMB, the Sub-Fund's functional and presentation currency. As a result, the Manager considers sensitivity analysis of currency risk is not necessary to be presented.

(b) Credit and counterparty risk

Credit and counterparty risk is the risk that an issuer or counterparty will be unable or unwilling to meet a commitment that it has entered into with the Sub-Fund.

The Sub-Fund limits its exposure to credit and counterparty risk by carrying out the majority of its investment transactions and contractual commitment activities with well-established broker-dealers, banks and regulated exchanges with high credit ratings.

All transactions in listed securities are settled or paid for upon delivery using approved and reputable brokers. In addition, the Sub-Fund places bank balances with reputable financial institutions. As such, the Manager does not consider the Sub-Fund to be exposed to significant credit and counterparty risk.

As at 30 June 2022, the Sub-Fund placed bank balances of RMB73,100,296 (31 December 2021: RMB23,525,023) and investments of RMB8,154,567,205 (31 December 2021: RMB6,625,360,088) with The Hong Kong and Shanghai Banking Corporation Limited ("HSBC"), which is the custodian of the Sub-Fund. The S&P credit rating of HSBC is A- (31 December 2021: A-).

(b) Credit and counterparty risk (Continued)

As at 30 June 2022, the Sub-Fund placed bank balances of RMB7,723,984 (31 December 2021:RMB16,870,371) and investments of RMB1,533,276,137 (31 December 2021:RMB2,751,040,161) with HSBC Bank (China) Company Limited ("HSBC China"), which is the PRC custodian of the Sub-Fund. The Moody's credit rating of HSBC China is A1 (31 December 2021:A1).

The unlisted funded total return swap held as at 30 June 2022 and 31 December 2021 was as follows:

Counterparty	Credit rating	Swap value <i>RMB</i>	Collateral value <i>RMB</i>	Collateral ratio
As at 30 June 2022				
JP Morgan Securities Plc, London	A+	1,134,522,555	1,112,821,496	98.09%
As at 31 December 2021				
JP Morgan Securities Plc, London	A+	977,470,346	980,323,516	100.29%

The Sub-Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management consider both historical analysis and forward looking information in determining any expected credit loss. As at 30 June 2022 and 31 December 2021, deposit reserve, interest receivable from bank deposits, interest receivable from derivative financial instruments and bank balances are held with counterparties with high credit ratings and are due to be settled within 1 month. Management consider the probability of default to be close to zero as the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Sub-Fund.

The maximum exposure to credit risk as at 30 June 2022 and 31 December 2021 is the carrying amount of the financial assets as shown on the condensed statement of financial position.

9. FINANCIAL RISK MANAGEMENT (Continued)

(c) Liquidity risk

Liquidity risk is the risk that the Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Sub-Fund is exposed to daily redemptions of units in the Sub-Fund. The Sub-Fund invests the majority of its assets in securities that are traded in an active market which can be readily disposed of.

The table below analyses the Sub-Fund's financial liabilities into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

(d) Fair value estimation

The Sub-Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Sub-Fund can access at the measurement date (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

NOTES TO THE UNAUDITED CONDENSED FINANCIAL STATEMENTS

9. FINANCIAL RISK MANAGEMENT (Continued)

(d) Fair value estimation (Continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgment by the Sub-Fund. The Sub-Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy the Sub-Fund's financial assets (by class) measured at fair value at 30 June 2022 and 31 December 2021:

	Level 1 RMB	Level 2 RMB	Level 3 RMB	Total <i>RMB</i>
As at 30 June 2022 Assets Investment - Equity securities Derivative financial instruments	9,687,843,342	-	-	9,687,843,342
-Unlisted funded total return swap	-	1,134,522,555	-	1,134,522,555
Total assets	9,687,843,342	1,134,522,555	-	10,822,365,897
As at 31 December 2021 Assets Investment - Equity securities Derivative financial instruments - Unlisted funded total return swap	9,376,400,249	977,470,346	-	9,376,400,249 977,470,346
Total assets	9,376,400,249	977,470,346	-	10,353,870,595

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities. The Sub-Fund does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. As at 31 December 2021, unlisted funded total return swap is classified within level 2.

NOTES TO THE UNAUDITED CONDENSED FINANCIAL STATEMENTS

9. FINANCIAL RISK MANAGEMENT (Continued)

(d) Fair value estimation (Continued)

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently or do not trade. As at 30 June 2022 and 31 December 2021, the Sub-Fund did not hold any investments classified in level 3.

As at 30 June 2022 and 31 December 2021, there was no investment held by the Sub-Fund which has been suspended for trading.

During the period ended 30 June 2022 and year ended 31 December 2021, there has been no securities transferred from level 2 to level 1

Transfer between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

The assets and liabilities included in the condensed statement of financial position, other than investments and derivative financial instruments, are carried at amortised cost; their carrying value are approximation of fair value. There are no other assets and liabilities not carried at fair value but for which fair value is disclosed.

(e) Capital risk management

The Sub-Fund's capital is represented by the redeemable units outstanding. The Sub-Fund's objective is to provide investment results that correspond generally to the performance of the respective index. The Manager may:

- Redeem and issue new units on a daily basis in accordance with the constitutive documents of the Sub-Fund;

All the financial liabilities of the Sub-Fund are carried at amortised cost.

12. INVESTMENT LIMITATION AND PROHIBITIONS UNDER THE SFC CODE
